FOREWORD

The *ABS Classification of Qualifications – Manual Coding System* is one of two publications which comprise the Australian Bureau of Statistics Classification of Qualifications (ABSCQ). This publication is intended for use in coding information on post-school educational qualifications.

The ABSCQ was first used in the 1991 Census of Population and Housing, and is being progressively introduced into other ABS collections. To enhance comparability of education statistics from different sources, use of the classification by other agencies involved in the production of statistics on post-school qualifications and courses is encouraged.

The application of the ABSCQ requires not only a set of standard definitions and concepts, but also a standard method for accurately and consistently assigning codes to information relating to qualifications. Information on qualifications is usually produced by asking a series of open-ended questions relating to the qualification and then coding the response to a standard classification.

The *ABS Classification of Qualifications – Manual Coding System* was developed to enable a 4-digit code (level of attainment and field of study) to be assigned, with a high degree of accuracy and consistency, to information about a particular qualification. Coding information on qualifications according to the procedures set out in the Manual Coding System will enable users to produce statistics compatible with those produced by the ABS. Users should refer to the *ABS Classification of Qualifications (ABSCQ)* (1262.0) when interpreting statistics coded to this classification. This classification will be revised periodically to reflect changes in post-school educational qualifications in Australia.

1. INTRODUCTION

The Australian Bureau of Statistics Classification of Qualifications (ABSCQ) was initially developed for use in the 1991 Census of Population and Housing. It has now been adopted as an ABS standard for use in the production and analysis of data on post-school educational qualifications. To enhance comparability of educational statistics from different sources, use of the classification by other agencies involved in the production of statistics on post-school qualifications is encouraged.

The classification is designed for use in the collection and presentation of data on qualifications held by the population of Australia at the present time. Although the classification is based on qualifications currently available in Australia, those previously awarded and overseas qualifications may also be classified to the nearest contemporary Australian equivalent.

The Manual Coding System is based on the principles used to code qualifications in the 1991 Census of Population and Housing. The rules and guidelines are designed to assign a code to the highest qualification held. In cases where the highest qualification cannot be identified, the first qualification named is coded. These rules may be modified to suit different data needs, for example, coding the most recent or all qualifications. However, it is important that the fundamental coding principles set out in the manual are retained to maintain consistency with Census data. Please contact the Classifications, Standards and Dissemination Section of the Australian Bureau of Statistics on (06) 252 5589 on how to modify the rules to suit your needs.

For the purposes of the ABSCQ an 'educational qualification' is considered to be an award for attainment as a result of formal learning, from an accredited post-school institution. Such institutions include TAFE colleges, universities and some private education and training providers. Also included are professional bodies which authorise people to work in particular occupations, such as the various medical colleges which provide training in the post-basic medical specialties. Hospital based nursing awards are also included.

The attributes of qualifications which are of primary interest to users of ABS statistics are the level of the qualification and field in which the qualification is held. Therefore the ABSCQ has been designed to classify an educational qualification according to two main elements:

level of attainment; and

field of study.

The **Level of Attainment** is a function of the quality and quantity of learning necessary to obtain that qualification. These are measured operationally in terms of the following three criteria:

- the minimum amount of prior education needed to undertake the course of study at that level; that is, the minimum entry requirements for the course;
- the duration of the course; and
- the theoretical orientation of the course measured in terms of theoretical, factual and practical learning.

The **Field of Study** refers to the subject matter taught in the course of study leading to the award of a particular qualification. Two qualifications belong to the same broad field of study if the theoretical knowledge which underpins the learning is the same. For practically oriented qualifications which do not generally require large amounts of theoretical learning, factual and practical learning are considered. In developing the structure of the Field of Study Classification the criteria used were:

- *Theoretical content* – this is defined as that part of the subject matter which links facts together to explain other facts and predict outcomes;

- *Purpose of learning* – this refers to the skills and knowledge gained from a course of study; that is, the application of the body of theory learnt;
- *Objects of interest* – these are the things or phenomena studied;
- *Methods and techniques* – these are the specific procedures for applying the knowledge gained in a course of study; and
- *Tools and equipment* – these are the instruments and implements used to apply the methods and techniques of a course of study.

The Field of Study Classification has a hierarchical structure consisting of three levels:

Broad Field – the broadest level of the classification. Broad fields are distinguished from each other on the basis of the theoretical content of the course and the purpose of learning, and are denoted by a 1-digit code. There are 9 broad fields.

Narrow Field – subdivisions of the broad fields. Narrow fields are distinguished from other narrow fields on the basis of the objects of interest, or the main area of concern. They are denoted by a 2-digit code (the relevant broad field code, plus an additional digit). There are 46 narrow fields.

Detailed Field – subdivisions of the narrow fields. Detailed fields are distinguished from other detailed fields on the basis of methods, techniques, and tools and equipment. They are denoted by a 3-digit code (the relevant narrow field plus an additional digit). There are 187 detailed fields.

The following example illustrates these conventions:

Category	*Code*	*Title*
Broad Field	4	Society and Culture
Narrow Field	48	Visual and Performing Arts
Detailed Field	486	Drama and Dance

Information on both the Level of Attainment and Field of Study can be provided in the one 4-digit code. The first digit in this code indicates the level of attainment and the last three indicate field of study.

The conceptual basis and the structure of the Classification are discussed in greater detail in the *ABS Classification of Qualifications* (ABSCQ) (1262.0). For further information about this publication and related floppy disc products contact the Classifications, Standards and Dissemination Section of the Australian Bureau of Statistics on (06) 252 5589.

2. THE CODING STRATEGY

The *ABSCQ Manual Coding System* is designed to code both level of attainment and field of study. The coding strategy is designed such that field of study is determined first, then the level of attainment. To ensure that the coding of qualifications data is carried out accurately and consistently, the coding strategy uses a two-stage process.

In the first stage, responses are coded according to a set of formal rules. These coding rules are based on distinguishing **basic, qualifying** and **level of attainment** words from any given response. The rules are designed to enable the coder to process the data without an in-depth knowledge of the classification structure.

The second stage is applied when data cannot be coded using the first stage principles, i.e. when a response is vague, ambiguous or incomplete. These are known as *queries*. Such responses are referred to query resolution procedures where the coding rules are progressively relaxed. When resolving queries it is necessary to refer to the conceptual basis of the classification, and the level of attainment and field of study definitions, which are found in the *ABS Classification of Qualifications (ABSCQ)* (1262.0). It is essential to have a good understanding of these definitions, and the classification structure, in order to assign codes to queries.

2.1 Principles of the Coding Method

Codes are assigned to qualifications on the basis of the information given in response to questions on the level and field of study of qualifications held. Information about the institution from which a qualification was gained may be used in some cases, particularly where research has shown that this may assist in assigning the most accurate code for the level of attainment. Information on occupation is not required in the coding of qualifications, and should not be used to impute detail about a qualification where a response is ambiguous or incomplete. To do so would introduce bias into the coding process.

The fundamental principle of the coding method is that information from responses can be sorted into **basic, qualifying** and **level** words, and that these can each be matched with specific parts of an index entry. To reduce the number of queries, specific index entries have been constructed to deal with responses that are not strictly qualification titles, but which are commonly used by respondents. Entries have also been constructed to deal with responses where the information is vague or incomplete.

2.2 The Coding Index

The coding index is a comprehensive list of Australian qualifications, and was used to code qualifications data in the 1991 Census of Population and Housing. The wording of the index is based on language commonly used by people to describe their own or other people's qualifications. The index itself is structured such that the basic, qualifying and level words can be easily identified. An example of the index structure is illustrated below:

3121	Systems	, Information	/ management	/ Bachelor
code	*basic word (exact match)*	*, qualifying word (exact match)*	*/ qualifying word (close match)*	*/ level (exact match)*

The rules governing exact and close matching are described in *Part 2, Section 2.2 Matching Rules.*

For the purposes of coding, the index has been sorted in two ways. *Part 3 Coding Index* of this manual is an alphabetical index which is used for first stage coding procedures. *Part 5 Coding Index: Numerical Order* is a numerically sorted index which is useful when resolving queries.

2.3 Coding Conventions

The ABSCQ uses a 4-digit code which is structured so that:

- the 1st digit indicates level of attainment;
- the 2nd digit indicates the broad field of study;
- the 2nd and 3rd digits indicate the narrow field of study; and
- the 2nd, 3rd and 4th digits indicate the detailed field of study.

Example:
A Certificate in Panelbeating has the code 7673.

The first digit indicates the level of attainment; i.e. Level 7 Basic Vocational Qualifications.

The 2nd digit indicates the broad field of study; i.e. Broad Field 6 Engineering.

The 2nd and 3rd digits indicate the narrow field; i.e. Narrow Field 67 Automotive Engineering.

The 2nd, 3rd and 4th digits indicate the detailed field; i.e. Detailed Field 673 Panel Beating.

Codes ending in '9' are allocated to known fields of study which may belong to a particular broad or narrow field of study but which are not common enough to form a distinct narrow or detailed field of study. These are the 'other' or 'not elsewhere classified (nec)' categories. These categories should not be used to code responses which are inadequately described or ambiguous.

Codes ending in '0' are assigned to responses which cannot be coded to the most detailed field of study, but which can be coded to the narrow field of study. Codes ending in '00' are assigned to responses which can only be coded to a broad field of study. Both are described as 'not further defined' (nfd) codes. Codes ending in '000' are assigned to responses where there is absolutely no information about the field of study.

Codes commencing in '0' are assigned to responses which contain no information about the level of attainment of a qualification. Such responses may, however, contain information about the field of study. This information can be legitimately coded.

Codes commencing in '8' are assigned to responses where the information about the level of attainment is not sufficient to assign a code, i.e. the level is *uncodable*. Similarly when the information on field of study is missing or insufficient to code properly, then a code of '888' is assigned to the field of study.

A qualification is defined as an award of attainment from an accredited post-school institution as the result of formal learning. If a response does not meet this definition then it is not within the scope of the classification. Such responses are assigned the code '9989'. Qualifications such as Higher School Certificates and Senior Certificates are out of scope, as are hobby and personal enrichment courses. As information about such qualifications are frequently given by respondents in statistical collections, entries are included in the ABSCQ Coding Index to facilitate the efficient assignment of 'out of scope' codes.

3. RECOMMENDED DATA ITEMS

To ensure accurate and consistent coding it is recommended that the following four data items be collected:

- the name of the qualification;
- the main field of study for that qualification;
- the institution from which the qualification was gained; and
- whether the qualification is a trade qualification.

Other information, such as occupation, should not be used in the coding process as there may be no direct correlation between it and educational qualifications.

Information on qualifications can be reported in many different ways. The following are a sample of the different ways it can be reported.

a)	Name of Qualification:	Associate Diploma in Business Management
	Field of Study:	-----
	Institution:	TAFE
	Trade Qualification:	No
b)	Name of Qualification:	Bachelor Degree
	Field of Study:	Geography
	Institution:	Uni of Canberra
	Trade Qualification:	No
c)	Name of Qualification:	Certificate in fitting and turning
	Field of Study:	fitting and turning
	Institution:	-----
	Trade Qualification:	Yes
d)	Name of Qualification:	Bachelor of Mathematics
	Field of Study:	Linear Algebra
	Institution:	Uni of Newcastle
	Trade Qualification:	No

It can be seen that sometimes the actual name of a qualification contains both the level of attainment and field of study information, as in examples a), c) and d). In some cases, the level of attainment and field of study information may be reported separately, as in example b). It is also possible that field of study information may be given in both the name of the qualification and the field of study questions, as in examples b), c) and d). There may also be additional level information given as in example c), i.e. it is a trade qualification.

Institution Information

Collecting the name of the institution is useful for coding some qualifications. In some instances the name of qualifications from different institutions may appear to be similar but are assessed, according to ABSCQ criteria, as being different levels of attainment. Some index entries include institution words to facilitate accurate coding of such qualifications. Information about the educational institution is also helpful when resolving queries (those responses that cannot be coded using basic procedures).

Trade Qualification Information

Collecting specific information about a trade qualification, or asking whether the person has completed an apprenticeship, assists in coding the type of qualification correctly. The term *certificate* is often used in a very general sense when referring to a qualification and to code all *certificates* to either Level 7 Basic Vocational Qualifications, or Level 6 Skilled Vocational Qualifications, would be incorrect. To overcome confusion and inaccurate coding, it is necessary to ascertain whether a certificate is a *trade* qualification (or whether the person has completed an apprenticeship). Many users of qualifications data also require specific information on trade qualifications.

6. General Coding Exercises **2 – 42**

1. THE CODING METHOD

The aim of the coding process is to assign a four digit code to each qualification. In order to ensure that this is done consistently and accurately, the following set of guidelines has been developed to help code qualifications information.

1.1 Coding Simple Qualifications

A qualification consists of two pieces of information: level of attainment and field of study. These need to be identified separately before you start coding.

1.1.1 *Identifying Level of Attainment*

Level Words are those which describe how advanced the qualification is. They usually occur in response to the name of qualification question and/or the trade qualification question. Sometimes there may be more than one level word (or phrase) for a given set of responses. The following are some of the more common examples of level words that you will encounter.

A Grade	Diploma
Advanced Certificate	Doctorate (Ph.D)
Associate Diploma	Graduate Diploma
Bachelor	Masters
Certificate	Trade Certificate

1.1.2 *Identifying Field of Study*

Field of Study Words describe the content of the qualification, and can be single words or phrases. In the following examples the field of study words are in bold type.

Name of Qualification:	Advanced Certificate
Field of Study:	**Arboriculture**
Name of Qualification:	Bachelor of **Science**
Field of Study:	**Computer Science**
Name of Qualification:	-----
Field of Study:	Chartered **Accounting**
Name of Qualification:	Trade Certificate
Field of Study:	**Hairdressing**

Note that in the first case, *Advanced Certificate* describes the level of attainment. In the next case, the level word is *Bachelor*. In the third case, *Chartered* is the level word and in the last case, *Trade Certificate* describes the level of attainment.

Having identified the level of attainment and the field of study, you need to specifically identify at least one, and possibly two, further elements (the Basic Word and any Qualifying Words) before continuing. Basic and qualifying words are usually found in the field of study information.

1.1.3 *Identifying the Basic Word*

The **Basic Word** is the single word that best describes the field of study of a qualification. It is the word that best answers the question: "What is the qualification about?" Once you have identified the basic word you can begin coding.

Example:

Name of Qualification:	Panelbeating certificate
Field of Study:	-----

In this example, the level word is *certificate* and the field of study is *panelbeating*. As there is only one word in the field of study, it is the basic word. Turn to the Coding Index (Part 3) and look up the word *panelbeating*. You will find a block of entries for *panelbeating* with different levels of attainment.

5673	Panelbeating/ Advanced Certificate
6673	Panelbeating/ Apprenticeship
7673	**Panelbeating/ Certificate**
7673	Panelbeating/ Pre-apprenticeship
6673	Panelbeating/ Trade Certificate
0673	Panelbeating/ NAI (about level)

The entry in bold is the correct entry for this response, and the code 7673 is assigned to this response.

In the example above there is only one word used for level and one for field of study. In cases like this the basic word will always be the single field of study. However, qualifications often have more than one word to describe the field of study.

1.1.4 *Identifying Qualifying Words*

Qualifying Words add detail to the basic word. They help to clarify what the qualification is about. Qualifying words answer the question: "What sort of ...?"

What sort of teaching?	*primary school* teaching
What sort of fitting?	*electrical* fitting

Example:

Name of Qualification:	Associate Diploma
Field of Study:	Child Care

When the field of study contains more than one word, you need to distinguish the basic word from the qualifying word(s). Remember, the basic word is the word that tells us what the qualification is primarily about. In the above example the qualification is about *care*. The word *child* tells what sort of care. It provides more detail about the qualification, so it is a qualifying word. Once you have found the word *care* in the Coding Index, look for *child* in the list of qualifying words and then match the level *associate diploma*.

5422 Care, Child/ Associate Diploma

This is the correct entry, and the code 5422 is assigned to this response.

1.1.5 *Coding Exercises* (solutions to all coding exercises are found in Part 6 of this manual)

1)

Name of Qualification:	Advanced Certificate
Field of Study:	Arboriculture
Institution:	Victorian College of Agriculture
Trade Qualification:	No

2) Name of Qualification: Associate Diploma
Field of Study: Residential Care
Institution: Brisbane CAE
Trade Qualification: No

3) Name of Qualification: Trade Certificate
Field of Study: Hairdressing
Institution: Reid TAFE College
Trade Qualification: Yes

4) Name of Qualification: Graduate Diploma
Field of Study: Public Relations
Institution: ANU
Trade Qualification: No

5) Name of Qualification: Certificate of Locksmithing
Field of Study: Locksmithing
Institution: Sydney Technical College
Trade Qualification: No

6) Name of Qualification: Apprenticeship
Field of Study: Graphic Reproduction
Institution: Regency College of TAFE, SA
Trade Qualification: -----

7) Name of Qualification: Master
Field of Study: Physics
Institution: Uni of NSW
Trade Qualification: No

8) Name of Qualification: Graduate Diploma
Field of Study: School Librarianship
Institution: Monash Uni
Trade Qualification: No

9) Name of Qualification: Certificate of Technology
Field of Study: Fisheries Operation
Institution: Australian Maritime College
Trade Qualification: No

10) Name of Qualification: Bachelor of Metallurgy
Field of Study: Metallurgy
Institution: University of Newcastle
Trade Qualification: No

11) Name of Qualification: Bachelor
Field of Study: Police Studies
Institution: Charles Sturt University
Trade Qualification: No

12) Name of Qualification: Doctorate
Field of Study: Oceanography
Institution: RMIT
Trade Qualification: No

13) Name of Qualification: Advanced Certificate
Field of Study: Dental Technology
Institution: Sydney Tech
Trade Qualification: No

14) Name of Qualification: Associate Diploma
Field of Study: Dancing
Institution: QUT
Trade Qualification: No

15) Name of Qualification: Bachelor of Occupational Therapy
Field of Study: Occupational Therapy
Institution: Cumberland College of Health Sciences
Trade Qualification: No

1.2 Common Problems Encountered in Coding

People report their qualifications in different ways. Different words and abbreviations may be used to describe qualifications, which can create problems when coding. In this section we will look at how to use the Coding Index to overcome the more common coding problems.

1.2.1 *Abbreviations*

Respondents will often use abbreviations when describing a qualification. It is useful to know the meanings of a few of the more common abbreviations.

Some Common Abbreviations:

BA	Bachelor of Arts
BSc	Bachelor of Science
MA	Master of Arts
MSc	Master of Science
Ph.D	Doctorate
Grad Dip	Graduate Diploma
Assoc Dip	Associate Diploma
Adv Cert	Advanced Certificate
Dip	Diploma
Dip Ed	Diploma of Education
Dip T	Diploma of Teaching
App Sc	Applied Science

Soc Sc	Social Science
LLB	Bachelor of Law
C of T	Certificate of Technology

It is important that you select an exact equivalent when matching these abbreviations with an index entry. If a response has *Assoc Dip* written as the level of attainment then the only index entry that can be matched exactly is *Associate Diploma*. If a level is not in the index then you need to refer to query resolution procedures.

1.2.2 *Acronyms*

Qualifications may be stated as acronyms, which are another form of abbreviation. For example, *Fellow of the Institute of Nursing Administrators* is often written as *FINA*, and *Certified Practising Accountant* is often abbreviated to *CPA*.

You will often find that the only response given is an acronym. In such cases, it is appropriate to use the acronym as the basic word. It is important, however, that what is written in the response is exactly the same as the index entry you choose, or you may assign a wrong code to that response. In the index, acronyms have no punctuation or spaces and are listed in alphabetical order in the body of the coding index.

Example:

Name of Qualification:	F.R.A.C.P
Field of Study:	-----

Remember that this will be found in the index without punctuation, so you will have to look for FRACP. The correct index entry is:

1218 FRACP

1.2.3 *Equivalent Qualification Names*

There are some qualification names that can be expressed in different ways. Rather than have an index entry for every possible name, there is one standard index entry for each qualification name. It is appropriate then to chose the equivalent name, even if the wording is slightly different. The important point is that they are the same level of attainment.

Examples of Name Equivalents:

Response	*Index Equivalent*
Pre-apprenticeship Certificate	Pre-apprenticeship
Apprenticeship Certificate	Apprenticeship
Doctor of Philosophy	Doctorate
Postgraduate Diploma	Graduate Diploma
Traineeship	Traineeship Certificate
Undergraduate Diploma	Diploma
Pre-vocational Certificate	Pre-vocational
Bachelor Degree	Bachelor

1.2.4 *Extraneous Words*

Sometimes there are words in a response that can be ignored. These are called extraneous words and are not needed to determine the correct code for that response.

If **all** the words in an index entry are in the response then it is allowable to select this entry. If a response contains extra qualifying words that are not in the index entry, they are considered to be extraneous and can be ignored. However, if there are words in the index entry that are **not** in the response, you cannot match on that entry.

Example:

Name of Qualification:	Bachelor
Field of Study:	Applied Physics

Look up *physics* (the basic word) in the index and you will find that there are no entries with qualifying words.

3521 Physics/ Bachelor

It is acceptable to select this entry as all of the words in the index entry are in the response. The code 3521 is assigned to this response.

Example:

Name of Qualification:	Certificate
Field of Study:	Small Boatyard Operation

The basic word is *operation*. Look this up and you will find *boatyard* as a qualifying word but not *small boatyard*.

7696 Operation, Boatyard/ Certificate

Again, it is correct to select this entry as all the words in the index entry are in the response. The code 7696 is assigned to this response.

Example:

Name of Qualification:	Diploma
Field of Study:	Drug Studies

The basic word is *studies*. Look this up in the index and you will find the following entry.

2429 Studies, Drug Dependence/ Diploma

Because the response does not specify drug *dependence* it would be incorrect to select this code. In this case the response would be referred to query resolution procedures.

In most cases, prepositions *(in, at, the,* etc*)* are extraneous and are omitted from index entries. However, they are sometimes necessary to make sense of the qualification, and in such cases they are included in the index entry. For example, the field of study *Sociology of Education* needs the word *'of'* included or it loses its meaning.

Sometimes level information is extraneous. If the term *honours* is used with an identified level of attainment, it can be ignored as it is considered to be a part of that level of attainment.

Example:

Name of Qualification:	Bachelor (Hons)
Field of Study:	Political Science

In this case, you would ignore the word *Hons (honours)* and code to the level of attainment *bachelor*.

However, if *honours* is used by itself or with an unidentifiable level of attainment, e.g. *honours degree*, the response should be referred to query resolution. In these cases the level cannot be determined because there are a number of different *honours* degrees.

1.2.5 *Coding Exercises*

1)

Name of Qualification:	Bachelor
Field of Study:	Pacific Defence Studies
Institution:	Australian National University
Trade Qualification:	No

2)	Name of Qualification:	AFAMI
	Field of Study:	-----
	Institution:	-----
	Trade Qualification:	-----
3)	Name of Qualification:	Doctor of Philosophy
	Field of Study:	Biological Science
	Institution:	Macquarie University
	Trade Qualification:	No
4)	Name of Qualification:	Grad Dip
	Field of Study:	Midwifery
	Institution:	La Trobe
	Trade Qualification:	No
5)	Name of Qualification:	Bachelor (Honours)
	Field of Study:	Computer Science
	Institution:	UNE
	Trade Qualification:	No
6)	Name of Qualification:	Graduate Diploma
	Field of Study:	Coal Geology
	Institution:	Wollongong Uni
	Trade Qualification:	-----
7)	Name of Qualification:	M Design
	Field of Study:	Interior Design
	Institution:	Uni of Technology, Sydney
	Trade Qualification:	No
8)	Name of Qualification:	AMusA
	Field of Study:	
	Institution:	Canberra Institute of Arts
	Trade Qualification:	
9)	Name of Qualification:	Post Grad Dip
	Field of Study:	Office Management
	Institution:	
	Trade Qualification:	
10)	Name of Qualification:	Trade Cert
	Field of Study:	CRTS
	Institution:	
	Trade Qualification:	Yes

11) Name of Qualification: Traineeship
Field of Study: Child Care
Institution: TAFE/Local Govt Child Care Centre
Trade Qualification:

12) Name of Qualification: Grad Dip
Field of Study: Growing Small Fruits
Institution:
Trade Qualification:

13) Name of Qualification: Certificate in Commercial Floristry
Field of Study: Floristry
Institution: Weston TAFE, ACT
Trade Qualification:

14) Name of Qualification: Assoc Dip
Field of Study: Viticulture
Institution: Charles Sturt Uni
Trade Qualification: No

15) Name of Qualification: B
Field of Study: Islamic Culture
Institution: Uni of Sydney
Trade Qualification:

1.3 Summary

- The first step when coding is to identify the level of attainment and field of study in a response.
- Select the basic word from the field of study and identify all qualifying words.
- Match on the basic and any qualifying words in the index.
- Match on level of attainment information.
- If **all** the words in the index entry are in the response, that entry can be selected. Any extra words in the response that are not in the index entry are extraneous and can be ignored.
- If there are words in the index entry that are **not** in the response, that entry **cannot** be selected.
- If an acronym is used for the field of study it may sometimes be used as the basic word.
- Once the basic and qualifying words are matched, select the entry that matches with the level of attainment given in the response.

2. USING THE CODING INDEX

The Coding Index is designed to facilitate the consistent coding of qualifications information. It is important to understand the conventions governing the structure of the index in order to use it correctly. In this section, the structure of the index and its use is described.

2.1 The Format of the Coding Index

The Coding Index is sorted alphabetically into basic word blocks. Each of these blocks are ordered in accordance with specific conventions governing the way in which the index is used (see *Section 2.2 Matching Rules*).

2.1.1 *Structure of Basic Word Blocks*

Within each basic word block there may be qualifying word sections. Those sections with a basic word and qualifying word(s) separated by a comma (,) will always precede those sections separated by a slash (/).

Example:

5480 Arts, Visual/ Associate Diploma
3480 Arts, Visual/ Bachelor
4480 Arts, Visual/ Diploma
1480 Arts, Visual/ Doctorate
. . . .
0480 Arts, Visual/ NAI (about level)

Next, are those entries with basic word then a slash (/) followed by qualifying words.

8480 Arts/ Royal Society/ Advanced
0480 Arts/ Royal Society/ NAI (about level)

Each qualifying word section is also alphabetically ordered.

Example:

. . . .
0638 Technician, Television/ NAI (about level)
7489 Technician, Theatre/ cinema/ Certificate
4489 Technician, Theatre/ cinema/ Diploma
0489 Technician, Theatre/ cinema/ NAI (about level)
3229 Technician, Theatre/ nursing
5489 Technician, Theatre/ stage/ Advanced Certificate
7489 Technician, Theatre/ stage/ Certificate
4489 Technician, Theatre/ stage/ Diploma
0489 Technician, Theatre/ stage/ NAI (about level)
7643 Technician, Washing Machine/ Certificate
0643 Technician, Washing Machine/ NAI (about level)
7912 Technician/ nail/ from a TAFE or technical college
9989 Technician/ nail/ except above
6888 Technician/ NAI (about type of technician)/ Apprenticeship
. . . .

Entries are also sorted so that those with the greatest number of qualifying words come before those entries containing less detail.

Example:

5592 Science, Medical Laboratory/ Associate Diploma

. . . .

5219 Science, Medical/ Associate Diploma

. . . .

2.2 Matching Rules

In the index, words separated by commas (,) or slashes (/) or underlined have different rules determining how and when they are selected. There are two rules to remember when matching words in the index, the exact and close match rules.

2.2.1 *Exact Matching*

The first type, as the name implies, is when all the words in the index entry can be found in the response. So far all the coding exercises have been exact match cases.

Exact Match Rule

You must match exactly on all basic words, all qualifying words that follow a comma (,) and all underlined level words.

The *exact match on basic words* rule is relaxed when an occupation title is given instead of a qualification name. For example, someone may give a response such as *firefighter*. In this case it is allowable to match with *firefighting*. Similarly with responses such as *plumber* or *civil engineer* the appropriate basic word matches are *plumbing* and *engineering* respectively.

It is also considered to be an exact match if someone answers *yes* to the trade qualification question. In this case it is permissible to exact match on the level *Trade Certificate* if they respond 'yes' to such a question.

2.2.2 *Close Matching*

A close match occurs when the information in the response closely matches information in the index entry.

Close Match Rule

Words following a slash (/), which are not underlined, can be closely matched to information given in the response (this includes level and institution words which are not underlined).

Remember that words following a comma in the index require an exact match.

Example:

Name of Qualification:	Bachelor of Engineering
Field of Study:	Ship Surveying

The basic word is *surveying* and can be matched exactly. However, in the block of entries under *surveying* there are no qualifying words. Notice that apart from the first group of entries *Surveying + Mapping*, the rest are slash (/) entries requiring only a close match. You should look for an entry that has the same meaning as *ship*.

3694 Surveying/marine/ Bachelor

In this case *marine surveying* has a similar meaning to *ship surveying* and would be an appropriate match. The code 3694 is then be assigned to this response.

If you cannot find a close match, the response should be referred to query resolution procedures.

Example:

Name of Qualification:	Certificate
Field of Study:	Fibre Optics

The basic word *optics* can be matched exactly. The qualifying words listed under *optics* in the index are *dispensing*, *fitting* and *mechanical*. These are all slash (/) entries and so can be closely matched, however, none of them are an appropriate match for *fibre*. The *NAI (about type of optics)* cannot be selected either, as there is information about the type of optics studied. In this case the response would be referred to query resolution procedures.

Example:

Name of Qualification:	Certificate
Field of Study:	Massage
Institution:	Mt Lawley TAFE
Trade Qualification:	-----

The basic word *massage* can be matched exactly as can the level *certificate*. However there is an added component to the index entry that requires the use of institution information. In this case the information in the response indicates that the qualification was gained from a TAFE college so the certificate entry can be selected.

7239 Massage/ Certificate/ from a TAFE or technical college

The code 7239 is assigned to this response.

If the institution given in the response is not a TAFE or technical college, or if there is no institution information, the except above option should be selected.

2.2.3 *Coding Exercises*

1)

Name of Qualification:	Graduate Diploma
Field of Study:	Road Engineering
Institution:	RMIT
Trade Qualification:	No

2)

Name of Qualification:	Certificate
Field of Study:	Advertising Display
Institution:	-----
Trade Qualification:	-----

3)

Name of Qualification:	Apprenticeship
Field of Study:	Auto Tuning
Institution:	Reid TAFE
Trade Qualification:	-----

4)

Name of Qualification:	Certificate of Inspection
Field of Study:	Aeroplane Inspection
Institution:	-----
Trade Qualification:	-----

5) Name of Qualification: Trade Cert
Field of Study: Cast Iron Furniture Making
Institution: -----
Trade Qualification: Yes

6) Name of Qualification: Fellow Australian Institute of Health Surveyors
Field of Study: Environmental Health
Institution: -----
Trade Qualification: No

7) Name of Qualification: Master
Field of Study: Building Energy Systems
Institution: Sydney University
Trade Qualification: No

8) Name of Qualification: Bachelor
Field of Study: Animal Surgery
Institution: Adelaide University
Trade Qualification: No

9) Name of Qualification: Diploma
Field of Study: Agricultural Economics
Institution: UNE
Trade Qualification: -----

2.3 Default Index Entries

Sometimes you will find that you cannot choose a specific index entry. This may be because there is not enough information given in a response, or it is too general to be useful in the coding process. There are special entries in the index called *default entries*, that may be used when this occurs. Because you need to know what options are available in the index **before** selecting a default entry, they appear as the last entry in a block of entries for a basic word.

2.3.1 *No Additional Information (NAI)*

There are three types of No Additional Information (NAI) entries: *NAI (about field of study)*, *NAI (about type of...)*, and *NAI (about level)*. The first two types, *NAI (about field of study)* and *NAI (about type of...)*, will come at the end of a basic and qualifying word section and should be selected **only when there is no additional information** that can be used to code the field of study. The other type, NAI (about level), will come at the end of a series of valid level words and should be selected **only when there is no additional information** that can be used to code the level of attainment.

NAI entries for Field of Study

Example:
Name of Qualification: Certificate
Field of Study: Engineering

Look up the basic word *engineering* in the coding index. Because there is no additional information about the type of engineering studied you should select the *NAI (about type of engineering)* entry.

7600 Engineering/ NAI (about type of engineering)/ Certificate

The code 7600 is assigned to this response.

Example:

Name of Qualification:	Certificate of Vocational Studies
Field of Study:	-----

Look up the basic word *studies* and the qualifying word *vocational* in the coding index. Because there is no additional information about the field of study you should select the *NAI (about field of study)* entry.

7888 Studies, Vocational/ NAI (about field of study)/ Certificate

The code 7888 is assigned to this response.

NAI entries for Level of Attainment

The third type of *NAI* entries are those that should be selected when there is no additional information about the level of the qualification.

Example:

Name of Qualification:	Printmaker
Field of Study:	Printmaking

You will find a number of level entries under *printmaking* in the index. Because there has been no information given about the level you cannot choose any of these. There is, however, an *NAI (about level)* entry.

0482 Printmaking/ NAI (about level)

This entry should be selected and the code 0482 assigned to the response.

Refer to *Section 5.1 Missing Level of Attainment* for cases when there is no additional information about level in a response, and there is no *NAI (about level)* or *except above* entry in the index for a particular basic word.

2.3.2 *Except Above*

Except above entries are last in any block of qualifying or level words. *Except above* should be selected when you are able to match a basic word but are unable to match qualifying or level words.

Example:

Name of Qualification:	Master of Obstetrics
Field of Study:	Obstetrics

The basic word is *obstetrics* and can be matched exactly. The following options are given in the index.

2214 Obstetrics/ Diploma
2214 Obstetrics/ Graduate Diploma
1214 Obstetrics/ except above

The level word *Master* cannot be match with any of the level words in the index. The *except above* entry must therefore be selected.

Example:

Name of Qualification:	Oncology
Field of Study:	-----

When matching the basic word *oncology* the following options are given.

3229	Oncology/ nursing
1218	Oncology/ except above

Nothing in the response mentions *nursing* so this entry cannot be chosen. You must select the *except above* entry and assign the code 1218.

Remember:

- It is **not** acceptable to select an *NAI (about field of study)* or *NAI (about type of...)* entry if there is **any** information given in the response about field of study.
- It is **not** acceptable to select an *NAI (about level)* entry if there is **any** information given in the response about level of attainment.
- If you cannot match on anything and there is no *except above* option, refer to *Section 5 Missing Information.*

2.3.3 *Coding Exercises*

1)

Name of Qualification:	Diploma
Field of Study:	Agriculture
Institution:	-----
Trade Qualification:	No

2)

Name of Qualification:	-----
Field of Study:	Vehicle Body Making
Institution:	-----
Trade Qualification:	-----

3)

Name of Qualification:	Certificate of Technology
Field of Study:	Design Drafting
Institution:	RMIT
Trade Qualification:	No

4)

Name of Qualification:	Associate Diploma of Administration
Field of Study:	Administration
Institution:	-----
Trade Qualification:	No

5)

Name of Qualification:	Diploma
Field of Study:	Secretarial
Institution:	-----
Trade Qualification:	No

6)	Name of Qualification:	Certificate
	Field of Study:	Midwifery
	Institution:	-----
	Trade Qualification:	-----
7)	Name of Qualification:	Bachelor of Architecture
	Field of Study:	-----
	Institution:	Curtin Uni of Technology
	Trade Qualification:	-----
8)	Name of Qualification:	Doctorate
	Field of Study:	Aesthetics
	Institution:	Sydney Uni
	Trade Qualification:	-----
9)	Name of Qualification:	-----
	Field of Study:	Survey Assisting
	Institution:	-----
	Trade Qualification:	-----
10)	Name of Qualification:	Bachelor of Commerce
	Field of Study:	-----
	Institution:	Flinders Uni
	Trade Qualification:	No
11)	Name of Qualification:	-----
	Field of Study:	Welfare Officer
	Institution:	James Cook
	Trade Qualification:	No
12)	Name of Qualification:	PhD
	Field of Study:	Gynaecology
	Institution:	University of Melbourne
	Trade Qualification:	No
13)	Name of Qualification:	Master of Pathology
	Field of Study:	Pathology
	Institution:	Monash
	Trade Qualification:	-----

2.4 Code To

Rather than have each entry repeated for every variation of wording, the index often has entries containing the words *code to*. These will direct you to look under another specific word or words to continue coding.

Some *code to* entries are:

Chemist: code to Chemistry
Electrics: code to Electrical
Glasscutting: code to Work, Glass
Italian: code to Languages
Making, Template: code to Patternmaking
Packer: code to Packing
Shedhand, Shearing: code to Practice, Shedhand
Styling, Hair: code to Hairdressing
Therapist: code to Therapy
Typist: code to Typing
Woodwork: code to Woodworking

Example:

Name of Qualification:	Bachelor
Field of Study:	Accountancy

If you look up *accountancy* in the index you will find the entry:

???? Accountancy: code to Accounting

This tells you that the basic word has changed and you should continue coding using the new basic word, *accounting*. Match on *accounting* and then choose the *except above* option as none of the other entries match this response. Select *bachelor* for level of attainment.

3141 Accounting/ except above/ Bachelor

The code 3141 is assigned to this response.

Code to index entries can also apply to qualifying words.

Example:

Name of Qualification:	Certificate
Field of Study:	Template Making

In this example, the field of study is *template making*. If you look up *making* and then *template* in the coding index you will find the following entry.

???? Making, Template: code to Patternmaking

This entry tells you to look under a new basic word to continue coding this response. Look up the new basic word *patternmaking* in the index. There is no qualifying word describing the type of *patternmaking*, so look at the *except above* entries. The level word *certificate* can be matched exactly.

7646 Patternmaking/ except above/ Certificate

The code 7646 is assigned to this response.

Remember:

- Whenever the coding process leads to a *code to* index entry, continue according to its instructions.

2.4.1 *Coding Exercises*

1)

Name of Qualification:	Bachelor
Field of Study:	Linear Algebra
Institution:	Sydney University
Trade Qualification:	-----

2)

Name of Qualification:	Certificate
Field of Study:	Aerobic Instruction
Institution:	-----
Trade Qualification:	-----

3)

Name of Qualification:	-----
Field of Study:	Carriage Painting
Institution:	-----
Trade Qualification:	-----

4)

Name of Qualification:	Grad Dip
Field of Study:	Japanese
Institution:	Deakin Uni
Trade Qualification:	-----

2.5 Summary

- **Exact Match Rule** – exact match on all basic words, all qualifying words following a comma (,) and all underlined level words.
- An exact match is where all the words in the index entry can be found in the response
- When an occupation title is given in the response, match on the equivalent field of study i.e. *butcher....butchery.*
- Where someone answers 'yes' to the trade qualification question, it can be matched with the level *trade certificate.*
- **Close Match Rule** – words following a slash (/), which are not underlined, can be closely matched.
- A close match is where the qualifying words in a response can be matched with an index entry that has the same or similar meaning.
- Index entries with *NAI (about field of study)* or *NAI (about type of...)* can be selected only when there is no more information in a response about the field of study.
- Index entries with *NAI (about level)* can only be selected when there is no information in a response about the level of attainment.

  Except above entries can be selected when a basic word can be matched but qualifying or level words cannot be matched.
- When normal coding procedures leads to a directive (*code to*) continue coding according to its instructions.

3. CODING MORE COMPLEX RESPONSES

People may not always give responses that are straightforward. Because of this, some guidelines have been developed on how to code more difficult responses.

3.1 Basic Word Hierarchy

Sometimes it is hard to distinguish the basic from the qualifying word. This is usually where a qualifying word may, in a different qualification, be a basic word. In order to make it clear which words should be used where and when, and to make the coding process easier in these cases, a hierarchy of basic words has been developed. There are four sets of basic words in this hierarchy:

- aide
- management and administration
- education and teaching
- nursing

3.1.1 *Aide*

Whenever *aide* is used in a response it is **always the basic word.**

Example:

Name of Qualification:	Nursing aide
Field of Study:	-----

In this case *aide* is the basic word. Look this up in the index and then look for the qualifying word *nursing*.

7221 Aide, Nursing

The code 7221 is assigned to this response.

3.1.2 *Management and Administration*

Whenever a response contains either *management* or *administration*, it should **always** be used as the basic word **unless** *aide* is also used. If both *management* and *administration* are used in the one response, choose whichever is in the field of study as the basic word.

Example:

Name of Qualification:	Dip Education Administration
Field of Study:	-----

Even though in most cases *education* is a basic word, when *administration* or *management* is also in a response, they take precedence. Therefore, *administration* is the basic word in the example above. This is because this qualification is about the administrative aspect of education rather than teaching. Look up *administration* and then match on *education* and *diploma.*

2112 Administration, Education/ Diploma

The code 2112 is assigned to this response.

Example:

Name of Qualification: Bachelor of Administration
Field of Study: Business Management

Because both *administration* and *management* are used in this response, select the one in the field of study as the basic word, i.e. *management*. Look this up and match on *business* then select the correct level.

3111 Management, Business/ Bachelor

The code 3111 is the correct code for this response.

3.1.3 *Teaching and Education*

Next in the hierarchy are the words *education* and *teaching*. Whenever either of these words are used in a response it is **always** the basic word **unless** *management, administration* or *aide* is also used. If *management, administration* or *aide* are also used, they take precedence over *education* and *teaching*. When both *education* and *teaching* are used, the rule is the same as for *management* and *administration*. That is, choose whichever is in the field of study as the basic word.

Example:
Name of Qualification: Dip Teaching
Field of Study: Adult Education

Because *education* appears in the field of study this is the basic word and *adult* is the qualifying word. Look these up in the index and then carefully select the level. Make sure that you select *diploma of teaching* and not *diploma*.

4329 Education, Adult/ Diploma of Teaching (Dip T)

The code 4329 is assigned to this response.

Example:
Name of Qualification: Bachelor of Education
Field of Study: Early childhood

In this case neither *education* or *teaching* are in the field of study. However, *education* does occur in the name of the qualification and you should use this as the basic word. Look up *education* and *early childhood* in the index. The level is *bachelor*.

3311 Education, Early Childhood/ Bachelor

Assign the code 3311 to this response.

Example:
Name of Qualification: Dip T
Field of Study: Pre-school

This is similar to the example above, in that neither *education* or *teaching* are in the name of the qualification or the field of study. *Dip T* is short for *diploma of teaching* (see *Section 1.2.1 Abbreviations*). Therefore, in this case, *teaching* is the basic word. Look this up and then match on the qualifying words *pre-school* and the level *diploma of teaching (dip t)*.

4311 Teaching, Pre-school/ Diploma of Teaching (Dip T)

The correct code for this response is 4311.

Example:
Name of Qualification: Masters
Field of Study: Nursing Education

Both *nursing* and *education* seem to be legitimate basic words but according to the hierarchy *education* should be used. This is because this qualification is about educating nurses, and not nursing itself. Therefore, look up *education* first as the basic word and then match with *nursing* as the qualifying word. Choose the entry with the level *master*.

1322 Education, Nursing/ Master

The code for this response is 1322.

3.1.4 *Nursing*

Nursing qualifications follow the pattern of those mentioned above, so that wherever *nursing* is mentioned in a response, it is **always** the basic word, **unless** *aide, management, administration, education* or *teaching* are also used. These words take precedence over *nursing* as the basic word. *Enrolled, registered* and other similar words are level words. Qualifying words for nursing would be such words as *dental, veterinary, psychiatric*, etc.

Example:

Name of Qualification: Enrolled Nurse
Field of Study: -----

Nursing becomes the basic word because of the index entry *Nurse: code to Nursing*. As there is no field of study information select the *NAI (about type of nursing)* entry. *Enrolled* is the level.

7221 Nursing/ NAI (about type of nursing)/ Enrolled (EN)

The code 7221 is assigned to this response.

Example:

Name of Qualification: Registered Nurse
Field of Study: Geriatrics

Nursing is the basic word, *geriatrics* is the qualifying word and *registered* is the level.

3229 Nursing, Geriatrics/ Registered (RN)

The code 3229 is assigned to this response.

Example:

Name of Qualification: Associate Diploma
Field of Study: Dental Nursing

Nursing is the basic word, *dental* is the qualifying word and *associate diploma* is the level.

5225 Nursing, Dental/ Associate Diploma

The code 5225 is assigned to this response.

3.1.5 *Coding Exercises*

1) Name of Qualification: Diploma of Teaching
Field of Study: Physical Education
Institution: Monash University
Trade Qualification: No

2)	Name of Qualification:	Diploma of Education
	Field of Study:	Music Teaching
	Institution:	-----
	Trade Qualification:	-----
3)	Name of Qualification:	Diploma of Education
	Field of Study:	French, German
	Institution:	La Trobe Uni
	Trade Qualification:	No
4)	Name of Qualification:	Enrolled Nurse
	Field of Study:	Nursing
	Institution:	Meadowbank TAFE
	Trade Qualification:	No
5)	Name of Qualification:	Registered Nurse
	Field of Study:	Psychiatric Nursing
	Institution:	Phillip Institute of Technology
	Trade Qualification:	-----
6)	Name of Qualification:	Postgraduate Dip in Nursing
	Field of Study:	Midwifery
	Institution:	Curtin Uni of Technology
	Trade Qualification:	No
7)	Name of Qualification:	Bachelor
	Field of Study:	Library Information Management
	Institution:	University of New England
	Trade Qualification:	-----
8)	Name of Qualification:	Bachelor of Business
	Field of Study:	Public Administration
	Institution:	QIT
	Trade Qualification:	No
9)	Name of Qualification:	Dip Ed
	Field of Study:	Teacher Librarianship
	Institution:	-----
	Trade Qualification:	-----
10)	Name of Qualification:	PhD
	Field of Study:	Educational Administration
	Institution:	Curtin University
	Trade Qualification:	-----

11) Name of Qualification: Registered Dental Nurse
Field of Study: Assisting with dental treatment
Institution: -----
Trade Qualification: -----

12) Name of Qualification: Ph.D History
Field of Study: History of Nursing
Institution: Sydney Uni
Trade Qualification: No

13) Name of Qualification: Nurse Aide
Field of Study: Nursing
Institution: St John's Hospital Hobart
Trade Qualification: -----

14) Name of Qualification: Bachelor
Field of Study: Nursing Education
Institution: -----
Trade Qualification: -----

15) Name of Qualification: Teachers Aide
Field of Study: -----
Institution: -----
Trade Qualification: -----

16) Name of Qualification: Graduate Diploma
Field of Study: Nursing Administration
Institution: -----
Trade Qualification: -----

17) Name of Qualification: MA
Field of Study: Sociology of Education
Institution: -----
Trade Qualification: -----

18) Name of Qualification: Certificate of Administration
Field of Study: Office Management
Institution: -----
Trade Qualification: No

3.2 Vague Basic Words

There are some basic words which by themselves do not provide enough detail to code a response effectively. We call these *vague basic words*. These words frequently appear in the name of the qualification.

Example:

Name of Qualification:	Bachelor of Arts
Field of Study:	Sociology

In this case we would ignore the word *arts* and use *sociology*. This is because the term *Bachelor of Arts* is the name of the qualification and is not really related to the field of study.

When a response contains a vague basic word, begin coding by checking to see if there is another basic word you can use. If there is no other basic word then use the vague word to begin coding.

Example:

Name of Qualification:	Graduate Diploma of Business
Field of Study:	-----

In this example there is no other choice for the basic word, so the word *business* is used. Exact match on business then choose *NAI (about type of business)* as no other information is given and then match on *graduate diploma.*

2100 Business/ NAI (about type of business)/ Graduate Diploma

The code 2100 is assigned to this response.

Example:

Name of Qualification:	Bachelor of Veterinary Medicine
Field of Study:	Science

In this example the field of study given is *science* which is a vague basic word. However, *veterinary medicine* is given in the name of the qualification. This provides much more detail about the qualification and should be used to code the response. The basic word is *medicine* and if you look this up in the index you will find the following index entry.

3251 Medicine, Veterinary/ Bachelor

The code assigned to this response is 3251.

In general, there are six basic words that are considered to be vague basic words:

Arts
Business
Commerce
Humanities
Engineering
Science

In some responses, qualifying words may be given with these vague basic words to form a legitimate field of study.

Example:

Name of Qualification:	Graduate Diploma
Field of Study:	Computer Science

Even though *science* is a vague basic word, in combination with *computer* it is a useful field of study. The basic word is *science*, *computer* is the qualifying word and *graduate diploma* is the level. The correct index entry is:

2541 Science, Computer/ Graduate Diploma

The code 2541 is assigned to this response.

Example:

Name of Qualification:	Diploma
Field of Study:	Graphic Arts

In this example, *graphic arts* is a legitimate field of study. The basic word is *arts*, with *graphic* as the qualifying word, and *diploma* as the level word.

4484 Arts, Graphic/ Diploma

The code 4484 is assigned to the response.

There are some fields of study that are always vague, even when there is a qualifying word, e.g. *applied science, health science* and *social science*. Whenever these occur with more detailed information, ignore them and use the detailed information to code the response. If no other field of study information is available then use the vague field of study to code the response. The key to determining the correct basic word is to ask: "What is this qualification really about?"

Example:

Name of Qualification:	Bachelor Applied Science
Field of Study:	Civil Engineering

What is this qualification really about? Is it about *applied science* or *civil engineering? Civil engineering* tells us more about what this person has studied so it is the more useful field of study. Use *engineering* as the basic word to find the following entry.

3621 Engineering, Civil/ Bachelor

Assign the code 3621 to this response.

3.2.1 *Coding Exercises*

1)

Name of Qualification:	Bachelor of Applied Science
Field of Study:	Quantity Surveying
Institution:	Curtin Uni of Technology
Trade Qualification:	No

2)

Name of Qualification:	Master of Commerce
Field of Study:	Finance
Institution:	Uni of Melbourne
Trade Qualification:	No

3)

Name of Qualification:	Master of Humanities
Field of Study:	Literature
Institution:	Uni of Tasmania
Trade Qualification:	-----

4)

Name of Qualification:	Assoc Dip in Business
Field of Study:	Public Relations
Institution:	Charles Sturt Uni
Trade Qualification:	-----

5) Name of Qualification: Associate Diploma of Arts
Field of Study: Recreation Leadership
Institution: Footscray Institute of Technology
Trade Qualification: No

6) Name of Qualification: Bachelor of Science
Field of Study: Numerical Science
Institution: ANU
Trade Qualification: -----

7) Name of Qualification: MEng
Field of Study: Civil Engineering
Institution: Sydney University
Trade Qualification: No

3.3 Trade Qualifications

There are four reasons for collecting information about trade qualifications:

i) The respondent may provide only an occupation title

Example:
Name of Qualification: Electrician
Field of Study: -----

Electrician is an occupation title and does not necessarily indicate that the respondent has an *electrical* qualification. Collecting trade information separately helps to overcome this problem.

ii) The respondent may only provide field of study information

Example:
Name of Qualification: -----
Field of Study: Welding

This is similar to the above example. There is no way of determining the level of the qualification, unless information is collected elsewhere, i.e. the trade question.

iii) The respondent may use the word certificate when referring to a trade qualification

Example:
Name of Qualification: Hairdressing Certificate
Field of Study: Hairdressing

The word *certificate* may be used by a respondent when referring to their *trade certificate*. Information from a separate trade qualification question can help in determining the correct level of a qualification.

iv) Users may require specific data on trade qualifications

The following are some simple rules which have been developed to help with matching information given in the trade question with correct index entries.

3.3.1 *Two Levels Given and Both are in the Index*

Whenever there are two levels given for one field of study, look up the coding index and check for both levels. If both are present in the index then code the response to whichever is the highest level of attainment.

Example:

Name of Qualification:	Certificate in Plumbing
Field of Study:	Plumbing
Institution:	TAFE
Trade Qualification:	Yes

In this example the person has stated that they have a *certificate* and have also said *yes* to the trade question. This means that are two levels to match: *certificate* and *trade certificate*. Remember that a positive response to the trade question is considered to be an exact match on the level *trade certificate* (see *Section 2.2.1 Exact Matching*). In the index, under the basic word *plumbing* both these levels occur.

....

7726 Plumbing/ Certificate

....

6626 Plumbing/ Trade Certificate

....

The first digit of the trade certificate entry is '6' while the first digit of the certificate entry is '7'. This means that trade certificate is a *higher* level of attainment. In this case the response should be coded to the trade certificate entry and the code 6726 assigned.

Example:

Name of Qualification:	Advanced Cert
Field of Study:	Mining
Institution:	----
Trade Qualification:	Yes

Again there are two levels given: *advanced certificate* and *trade certificate*. Both of these occur under the basic word *mining* but the *highest* level in this case, denoted by the *lowest* first digit, is *advanced certificate*. The code assigned to this response is 5652.

3.3.2 *Two Levels Given and Only One is in the Index*

As in the case above, two levels have been given, but the index has an entry for only one of the levels. When this occurs, the response must be referred to query resolution procedures.

Example:

Name of Qualification:	Diploma
Field of Study:	Pipefitting
Institution:	Kangaroo Point Tafe
Trade Qualification:	Yes

In this case you will find an index entry for *trade certificate* under *pipefitting* but there is no *diploma* entry. Because you cannot match both levels given, refer the response to query resolution.

A query should also be raised if neither level given in the response can be matched with an index entry.

3.3.3 *Coding Exercises*

1) Name of Qualification: Bach of Ed
Field of Study: Secondary
Institution: Salisbury TAFE
Trade Qualification: Yes

2) Name of Qualification: Apprenticeship
Field of Study: Steam Engineering
Institution: Footscray TAFE College
Trade Qualification: Yes

3) Name of Qualification: Advanced Certificate
Field of Study: Auto Electrician
Institution: -----
Trade Qualification: Yes

4) Name of Qualification: Certificate
Field of Study: Leadlighting
Institution: Tas TAFE
Trade Qualification: Yes

5) Name of Qualification: Engineering
Field of Study: Mechanics
Institution: RMIT
Trade Qualification: Yes

6) Name of Qualification: Certificate
Field of Study: Electronic Instrument Technician
Institution: -----
Trade Qualification: Yes

7) Name of Qualification: 1st Class Certificate
Field of Study: Sheetmetal
Institution: Whyalla College of TAFE
Trade Qualification: Yes

8) Name of Qualification: City and Guilds
Field of Study: Metal Fabrication
Institution: -----
Trade Qualification: Yes

9) Name of Qualification: Associate Diploma
Field of Study: Radar Plotting
Institution: -----
Trade Qualification: Yes

10) Name of Qualification: Bookbinder
Field of Study: -----
Institution: Melb. College of Graphic Arts
Trade Qualification: Yes

11) Name of Qualification: Refrigeration Trade
Field of Study: Refrigeration
Institution: Granville TAFE College
Trade Qualification: Yes

12) Name of Qualification: Diploma
Field of Study: Beauty Therapy
Institution: Tas TAFE
Trade Qualification: Yes

13) Name of Qualification: Pre-apprenticeship
Field of Study: Signwriting
Institution: Melb College of Decoration
Trade Qualification: Yes

14) Name of Qualification: -----
Field of Study: Die Setting
Institution: RMIT
Trade Qualification: Yes

3.4 Summary

- To help choose the basic word, use the following hierarchy:

  aide
  management and administration
  education and teaching
  nursing

  - If *aide* is used in a response it is **always** the basic word.
  - If either *management* or *administration* is used in a response it is **always** the basic word **unless** *aide* is also used.
  - If both *management* and *administration* are used then choose whichever appears in the field of study question as the basic word.
  - If either *education* or *teaching* is used in a response it is **always** the basic word **unless** *aide*, *management* or *administration* is also used.
  - If both *education* and *teaching* are used then choose whichever appears in the field of study question as the basic word.
  - If *nursing* is used in a response it is **always** the basic word **unless** *aide*, *management*, *administration*, *education* or *teaching* are also used.

- If a *vague* basic word is used in a response, check to see if there is a more detailed basic word that can be used.

  The six vague basic words are:
  arts
  business
  humanities
  commerce
  engineering
  science

- If more detailed information is not available then begin coding using the vague basic word.

- If both trade qualification information and another level of attainment are in a response, match both levels and code to whichever is the highest level of attainment (i.e. the lowest level of attainment code).

- If either level cannot be matched (i.e. one is not in the index for a particular basic word) then refer the response to query resolution.

4. MULTIPLE MATCHING

So far we have specified rules for coding using one basic word. However, some qualifications may have more than one field of study and so may have more than one basic word. Information may also be given on more than one qualification. We will now look at those cases where you may be required to select more than one index entry for a particular qualification or response.

4.1 Dual Titled Index Entries

If two or more basic words have been given for field of study, this is called a multiple title. Here are some typical multiple titles used by respondents:

Fitting and Turning
Typing and Shorthand
Sales and Marketing
Administration and Law
Food and Nutrition
Furnishing and Restoration
Panelbeating and Spraypainting
Speech and Drama
Refrigeration and Airconditioning
Radio and Television
Textiles and Clothing
Purchasing and Supply

Some of the more common multiple titles have been included in the index. Some examples are:

Fitting + Turning
Typing + Shorthand
Sales + Marketing
Furnishing + Restoration
Food + Nutrition
Speech + Drama
Radio + Television
Refrigeration + Airconditioning
Textiles + Clothing

In the index, these two basic words are joined by a plus (+) sign. Where the index needs qualifying words, they are placed immediately after the basic words to which they refer.

Example:

Name of Qualification:	Trade Certificate
Field of Study:	Fitting and Turning

In this example both *fitting* and *turning* together describe the qualification, you cannot pick either one to represent the whole qualification. Look up *fitting* in the index and you will see that there a few entries with a plus (+) sign. Scan down these until you find *turning*, again you will find a number of entries that have *fitting + turning* with qualifying words. As there is no other information about the type of fitting and there is no *NAI (about type of fitting + turning)* entry, choose the *except above* entry and the corresponding level, *trade certificate*.

6643 Fitting + Turning/ except above/ Trade Certificate

The code 6643 is assigned to this response.

These qualifications may be expressed the other way round. The example above could have been *turning and fitting*. In this case you would first look up *turning*, and then look for *turning + fitting*. Because there is no such entry try swapping the order of the words and look for *fitting + turning*. If you cannot find an index entry after reversing the order of the words, code each basic word separately (see *Section 4.2 Different Fields of Study*).

Example:

Name of Qualification:	Advanced Certificate
Field of Study:	Purchasing and Supply

In the first instance you should look for *purchasing + supply*. When you cannot find this look for *supply + purchasing*. This is also not in the index which means you will have to code each basic word separately (see *Section 4.2 Different Fields of Study*).

4.1.1 *Coding Exercises*

1)

Name of Qualification:	Pre-apprenticeship Certificate
Field of Study:	Fabrication and Welding
Institution:	Campbelltown TAFE
Trade Qualification:	-----

2)

Name of Qualification:	Apprenticeship
Field of Study:	Tiling and Slating
Institution:	-----
Trade Qualification:	-----

3)

Name of Qualification:	
Field of Study:	Secretarial and Reception
Institution:	-----
Trade Qualification:	No

4)

Name of Qualification:	Trade Certificate
Field of Study:	Pastry and Cake
Institution:	-----
Trade Qualification:	Yes

5)

Name of Qualification:	Graduate Diploma
Field of Study:	Speech and Drama
Institution:	-----
Trade Qualification:	No

4.2 Different Fields of Study

The coding index does not list all possible combinations of two basic words as a joint title. Sometimes you may find that you have more than one basic word and both can be coded to different parts of the classification. In this section we look at single qualifications that have more than one field of study but only one level of attainment e.g. *certificate*. In most of these cases the level of attainment code for each field of study will be the same. However, there are cases where the level of attainment code will be different even though they may both have the same name. In such cases code to the highest level of attainment (i.e. the lowest first digit).

Example:

Name of Qualification:	Certificate
Field of Study:	Beauty Therapy and Make-up
Institution:	Flagstaff TAFE College
Trade Qualification:	No

In this example both fields of study can be matched under the basic words *therapy* and *make-up*. Institution information is required to match the level for *beauty therapy*.

6912	Therapy, Beauty/ Certificate/ from a TAFE or technical college
7912	Make-up/ Certificate

The field of study codes are the same but the level codes are different. Following the rule of coding to the highest level of attainment, the code 6912 is assigned to this response.

There are four possibilities when coding two fields of study:

i) they are coded to two different broad fields (e.g. Broad Field 2 Health and Broad Field 5 Natural and Physical Sciences);

ii) they are coded to the same broad field (e.g. Broad Field 2 Health) but different narrow fields (e.g. Narrow Field 21 Medicine and Narrow Field 25 Veterinary Studies);

iii) they are coded to the same broad field (e.g. Broad Field 2 Health) and the same narrow field (e.g. Narrow Field 21 Medicine), but are in different detailed fields (e.g. Detailed Field 211 General Medicine and Detailed Field 218 Internal Medicine); and

iv) they are coded to the same broad field (e.g. Broad Field 2 Health) but one is coded to the broad or narrow field of study only and the other is coded to a more specific field of study within that broad or narrow field. That is, the codes are nested one within the other. For example:

- one is coded to a broad field only (e.g. 200 Health) and the other is coded to a narrow field within that broad field (e.g. 210 Medicine);
- one is coded a broad field only (e.g. 200 Health) and the other is coded to a detailed field within that broad field (e.g. 211 General Medicine); or
- one is coded to a narrow field only (e.g. 210 Medicine) and the other is coded to a detailed field within that narrow field (e.g. 211 General Medicine).

4.2.1 *Different Broad Fields*

When more than one field of study is given and they are coded to different broad fields, i.e. the 2nd digits in the codes differ, it is difficult to choose between them. In such cases, in order to maintain consistency, code to the first field of study named.

Example:

Name of Qualification:	BA
Field of Study:	Japanese and Business

These are distinct fields of study. Neither one qualifies the other and so both are basic words. Begin coding by looking both up in the index and you will find the following entries.

????	Japanese: code to Languages	(follow this *code to*)
3442	Languages/ Bachelor	
3100	Business/NAI (about type of business)/ Bachelor	

The first digits are the same, so they are at the same level of attainment. However, the second digits differ indicating that they are in different broad fields of study. From the information given in the response we cannot assume one field is more important than the other. The rule is to code the first named field of study, *Japanese*, so the code 3442 is assigned.

4.2.2 *Same Broad Field of Study, Different Narrow Fields*

Sometimes two fields of study may be coded to the same broad field but are in different narrow fields. When this happens, take the digits in common and add trailing zeroes.

Example:

Name of Qualification:	Graduate Diploma
Field of Study:	Sociology and Law

This response has two distinct fields of study; *sociology* and *law*. Using these as basic words, the following index entries are selected.

2412	Sociology/ Graduate Diploma
2471	Law/ except above/ Graduate Diploma

Note that the *law* entry is an *except above* entry. This is because there is no information in the response that allows us to choose any other option. The codes indicate that both fields of study can be coded to a detailed field. In this case, however, the third digits of the codes differ indicating that they are coded to different narrow fields of study. Take the digits in common and make to a 4-digit code with trailing zeroes. The code for this response is 2400. In this case we are only coding to the broad field of study.

Example:

Name of Qualification:	Master
Field of Study:	Adult Education and ESL

The two basic words are *education*, with *adult* the qualifying word, and *ESL*. Look these up in the index to find the following index entries.

1329	Education, Adult/ Master
1391	ESL/ Master

The codes indicate that both fields of study can be coded to a detailed field. The first two digits of the codes are the same but the last two differ. This means that they are both coded to the same level of attainment and broad field, but are coded to different narrow fields of study. Take the digits in common and add zeroes to make a 4-digit code. The code assigned to this response is 1300.

4.2.3 *Same Broad Field, Same Narrow Field, Different Detailed Fields of Study*

In some cases two fields of study may be coded to the same broad and narrow fields but to different detailed fields of study. As before, take the digits in common, i.e. the first three digits and add a zero to make a 4-digit code.

Example:

Name of Qualification:	BSc in Physics and Chemistry
Field of Study:	-----

Both *physics* and *chemistry* are distinct fields of study and therefore both are basic words. Look both up in the index to find the following index entries.

3521 Physics/ Bachelor
3522 Chemistry/ Bachelor

In this case the first three digits are the same. This means that the level of attainment, and the broad and narrow fields of study are the same. The last digits are both non-zero indicating that both fields of study can be coded the detailed field level. However, the detailed fields are different and you cannot choose between them. To resolve this we take the digits in common and add a trailing zero. The code for this response is 3520. In this case we are only coding to the narrow field of study.

Example:
Name of Qualification: Associate Diploma
Field of Study: Building Technology and Building Inspection

The two basic words are *technology* and *inspection* with *building* as the qualifying word for both. Find these in the index and match on the level *associate diploma.*

5729 Inspection, Building/ Associate Diploma
5721 Technology, Building/ Associate Diploma

Both fields of study can be coded to the detailed field but they are different (the last digits are not the same) and one is not more correct than the other. As in the previous example, take the digits in common and add a zero to make a 4-digit code. The code assigned to this response is 5720.

4.2.4 *Nested Codes*

The term *nested codes* means it is possible to code two fields of study to different parts of the hierarchy within the same broad field, e.g. one is coded to the narrow field and one to the detailed field of the same broad field of study. In these cases the rule is to code to the lowest level of the structure, i.e. the code with the least number of trailing zeroes.

Example:
Name of Qualification: Graduate Diploma
Field of Study: Social Research and Anthropology

There are two fields of study, and therefore two basic words in this example; *research* and *anthropology*. The corresponding index entries are:

2400 Research, Social/ Graduate Diploma
2412 Anthropology/ Graduate Diploma

The first two digits of each code are the same, indicating that both the level and the broad field of study are the same. However, the code for *anthropology* has no zeroes indicating that it is coded to a detailed field of study. *Social research* has a code with two trailing zeroes indicating that it can only be coded to the broad field level. This means that the field of study code '412' is *nested* within the code '400', i.e. the code for *anthropology*, '412', is more detailed and is assigned to this response.

Example:
Name of Qualification: Associate Diploma
Field of Study: Animal Husbandry and Wool Production

Again in this example there are two fields of study; *animal husbandry* and *wool production*. The two basic words are *husbandry* and *production* and the corresponding index entries are:

5313 Husbandry, Animal/ Associate Diploma
5310 Production, Wool/ Associate Diploma

The first three digits of these codes are the same, indicating that the level of attainment as well as the broad and narrow fields of study are the same. In this case *wool production* can only be coded to the narrow field while *animal husbandry* can be coded to the detailed field within that narrow field. The more detailed code, 5313, is assigned to this response.

4.2.5 Two Fields of Study – Same Code

Sometimes the codes for two fields of study will be the same. This means that they are both in the same field of study in the classification. For coding purposes this is not a problem as the one code is assigned to the response.

Example:

Name of Qualification:	Associate Diploma
Field of Study:	Horticultural Science and Viticulture

Look up the basic word *science* and then the qualifying word *horticultural*. The second field of study is *viticulture*, look this up also. Match on *associate diploma* for both of these to find the following index entries.

5821 Science, Horticultural/ Associate Diploma
5821 Viticulture/ Associate Diploma

The codes for both of the fields of study are the same and the code 5821 is assigned to this response.

4.2.6 *Coding Exercises*

1)

Name of Qualification:	Bachelor of Business
Field of Study:	Accounting, Personnel Administration
Institution:	Brisbane CAE
Trade Qualification:	-----

2)

Name of Qualification:	Certificate
Field of Study:	Jig and Tool Drafting
Institution:	Footscray TAFE
Trade Qualification:	-----

3)

Name of Qualification:	Diploma in Engineering
Field of Study:	Civil and Computer Engineering
Institution:	Monash Uni
Trade Qualification:	No

4)

Name of Qualification:	Graduate Diploma of Business
Field of Study:	Administration and Public Policy
Institution:	Bond University
Trade Qualification:	-----

5)

Name of Qualification:	Postgraduate Dip in Urban and Regional Planning
Field of Study:	Planning
Institution:	Curtin Uni of Technology, Perth
Trade Qualification:	-----

6)	Name of Qualification:	Certificate
	Field of Study:	Public Relations and Reception
	Institution:	Granville TAFE College
	Trade Qualification:	No
7)	Name of Qualification:	Bachelor of Science
	Field of Study:	Sports Science and Medicine
	Institution:	Australian Institute of Sport
	Trade Qualification:	No
8)	Name of Qualification:	B Built Environment
	Field of Study:	Architecture
	Institution:	-----
	Trade Qualification:	-----
9)	Name of Qualification:	Trade Certificate
	Field of Study:	Fuel Injection Fitting & Mechanics
	Institution:	-----
	Trade Qualification:	Yes
10)	Name of Qualification:	Bachelor
	Field of Study:	Veterinary Science & Animal Husbandry
	Institution:	Uni of Adelaide
	Trade Qualification:	No

4.3 More Than One Qualification

Sometimes a respondent will give details on more than one qualification. The rule is to code to the qualification with the highest level of attainment, i.e the code with the lowest first digit.

Example:

Name of Qualification:	BA and Dip Ed
Field of Study:	English and Teaching

There are two qualifications named in this response; a *Bachelor of Arts (BA)* and a *Diploma of Education (Dip Ed)*. Begin by establishing the basic word in each qualification. To do this it is important that the correct qualification is matched with the correct field of study. In this example it is clear that the field of study *English* belongs with the *BA* and *teaching* is part of the *Dip Ed*. The basic word for the first qualification is *English*, while for the second it is *teaching* (see *Section 3.1 Basic Word Hierarchy*). The relevant index entries are:

3441	English/ except above/ Bachelor
2310	Teaching/ except above/ Diploma of Education (Dip Ed)

The first digits of the codes, i.e. the level of attainment, differ. Code to the highest qualification (i.e. the code with the lowest first digit). Therefore, the code 2310 is assigned to the response.

Sometimes two qualifications may be given and both have the same level of attainment in the ABSCQ e.g. both Advanced Certificate and Associate Diploma have a level of attainment of '5'. When this occurs, treat them as though they are the same level of attainment and code as per *Section 4.2 Different Field of Study*.

It is unusual for information to be given for more than two qualifications. However, when this does occur, repeat the guidelines above for all the qualifications.

4.3.1 *Coding Exercises*

1) Name of Qualification: Associate Diploma in Applied Design/ Dip T
Field of Study: Wood Design/ Secondary School Teaching
Institution: TSIT
Trade Qualification: -----

2) Name of Qualification: Bachelor of Arts, Grad Dip Social Science
Field of Study: English Literature, Social Research
Institution: University of Tasmania
Trade Qualification: No

3) Name of Qualification: Grad Dip in Agricultural Management, Certificate in Orcharding
Field of Study: -----
Institution: Victorian College of Agriculture and Horticulture
Trade Qualification: No

4) Name of Qualification: G Dip, M Clinical Psych
Field of Study: Drug Dependence Studies, Psychology
Institution: -----
Trade Qualification: -----

5) Name of Qualification: MA, Ph.D
Field of Study: Renaissance Studies, Philosophy of Education
Institution: -----
Trade Qualification: No

4.4 Summary

- When a dual title is used in a response look for a dual titled index entry (i.e. two basic words separated by a plus (+) sign).
- If a dual title cannot be found try reversing the word order (e.g. *fitting and turning....turning and fitting*).
- If a dual title cannot be found either way, code each word separately.
- If more than one field of study is given and they are coded to different broad fields, code to the first field named in the response.
- If two fields of study are given and they are coded to the same broad field but to different narrow fields, code to the broad field (i.e. take the digits in common and add trailing zeroes to make a 4-digit code).
- If two fields of study are given and they are coded to the same broad and narrow fields but to different detailed fields then code to the narrow field (i.e. take the digits in common and add trailing zero to make a 4-digit code).
- If two fields of study are coded to different parts of the hierarchy within the same broad field, code to the most detailed field possible, e.g. if one field of study is coded to the broad field and one to the narrow field, code to the narrow field etc.
- If more than one qualification is given, code the highest qualification (i.e. the lowest first digit).

5. MISSING INFORMATION

As was seen in *Section 2.3 Default Index Entries*, information may be omitted from a response. Usually there will be an *NAI (about ...)* or an *except above* entry to select. This section looks at how to deal with those cases where there are no default index entries.

5.1 Missing Level of Attainment

Sometimes level of attainment information is not given in a response.

5.1.1 *Index Assigned Codes*

In some cases, matching the field of study with an index entry will lead directly to a level regardless of whether level information is given in the response or not.

Example:

Name of Qualification:	Medical Haematology
Field of Study:	-----

The basic word in this example is haematology. Look this up in the index to find the following entry.

1218 Haematology/ medical

There are some qualifications for which level information is extraneous. Based on research, a qualification in haematology is considered to have a level of attainment commensurate with Level 1 Higher Degree. This index entry can be selected and the code 1218 assigned to this response.

5.1.2 *Same Codes for Field of Study*

Other cases may not be as straightforward. If there is no level information given in the response, and the index does not include an *NAI (about level)* or an *except above* entry, then the field of study code can be used with a leading '0' assigned for level.

Example:

Name of Qualification:	Quality Management
Field of Study:	-----

If you look up *management* and then *quality* in the index you will find that there are only two options, and both require level information.

2699 Management, Quality/ Graduate Diploma
1699 Management, Quality/ Master

Neither of these can be chosen because there is no level information in the response. As the field of study codes (the last three digits) are the same, use '0' as the level. The code 0699 is assigned to this response.

5.1.3 *Different Codes for Field of Study*

Occasionally you will find that you cannot make a decision on a code because the field of study code for some entries changes according to the level of the qualification.

Example:

Name of Qualification:	-----
Field of Study:	Pathology

When you look up *pathology* in the index you will find the following block of entries.

5592	Pathology/ NAI (about type of pathology)/ Associate Diploma
3511	Pathology/ NAI (about type of pathology)/ Bachelor
2216	Pathology/ NAI (about type of pathology)/ Diploma
1216	Pathology/ NAI (about type of pathology)/ Doctorate
1216	Pathology/ NAI (about type of pathology)/ Fellow
1216	Pathology/ NAI (about type of pathology)/ FRCPA
2216	Pathology/ NAI (about type of pathology)/ Graduate Diploma
1216	Pathology/ NAI (about type of pathology)/ Master
5592	Pathology/ NAI (about type of pathology)/ Technician Certificate

There are three possible field of study codes that could be assigned; '216', '511' and '592'. This is because research has shown that the fields of study differ depending on the level of study undertaken. As there is no level information in the response you do not know which field of study code to assign. In this case you should refer to query resolution procedures.

5.1.4 *Coding Exercises*

1)
Name of Qualification:	-----
Field of Study:	Saw Doctoring
Institution:	South East College of TAFE
Trade Qualification:	-----

2)
Name of Qualification:	Logic
Field of Study:	-----
Institution:	James Cook
Trade Qualification:	-----

3)
Name of Qualification:	-----
Field of Study:	Insurance Administration
Institution:	WA TAFE
Trade Qualification:	-----

4)
Name of Qualification:	-----
Field of Study:	Welding Technology
Institution:	TAFE
Trade Qualification:	-----

5)
Name of Qualification:	Tectonics
Field of Study:	-----
Institution:	-----
Trade Qualification:	-----

6)
Name of Qualification:	Social Planning
Field of Study:	-----
Institution:	-----
Trade Qualification:	-----

7) Name of Qualification: Fellow
Field of Study: Renal Medicine
Institution: RACP
Trade Qualification: -----

8) Name of Qualification: Certificate
Field of Study: Critical Care Nursing
Institution: -----
Trade Qualification: -----

9) Name of Qualification: Hat Making
Field of Study: -----
Institution: -----
Trade Qualification: -----

10) Name of Qualification: Animal Science
Field of Study: -----
Institution: -----
Trade Qualification: -----

5.2 Missing Field of Study

Sometimes level information will be provided without a field of study. When this occurs use the level information to code the response. Follow the usual coding procedures and choose the basic word and any qualifying words present.

Example:
Name of Qualification: Advanced Certificate
Field of Study: -----

The basic word is *certificate*, *advanced* tells us what type of certificate this is so it is a qualifying word. Look up *certificate* in the index and you will find the following entry.

5000 Certificate, Advanced

The code assigned to this response is 5000. Note that the code '000' is assigned for the field of study. This means that there is no field of study given for this.

5.2.1 *Coding Exercises*

1) Name of Qualification: Pre-vocational Certificate
Field of Study: -----
Institution: -----
Trade Qualification: -----

2) Name of Qualification: Pre-apprenticeship
Field of Study: -----
Institution: -----
Trade Qualification: -----

3)	Name of Qualification:	Bachelor degree
	Field of Study:	-----
	Institution:	-----
	Trade Qualification:	-----
4)	Name of Qualification:	HNC
	Field of Study:	-----
	Institution:	-----
	Trade Qualification:	-----
5)	Name of Qualification:	PhD
	Field of Study:	-----
	Institution:	-----
	Trade Qualification:	-----

5.3 Summary

- If level information is missing from a response and the correct index entry has *NAI (about level)*, select this entry.
- If level information is missing from a response and there is no *NAI (about level)* entry, assign a zero '0' for level where the field of study code is the same for all levels given in the index.
- If the field of study code differs according to the level of attainment, refer the response to query resolution procedures.
- If level information is given in a response but there is no field of study, use the level information given to code the response.

6. GENERAL CODING EXERCISES

1)
Name of Qualification: Bachelor of Arts
Field of Study: Music composing
Institution: -----
Trade Qualification: -----

2)
Name of Qualification: D Div
Field of Study: -----
Institution: Catholic Inst of Sydney
Trade Qualification: -----

3)
Name of Qualification: Assoc Dip Applied Science
Field of Study: Sport and Exercise
Institution: Northern Rivers CAE
Trade Qualification: -----

4)
Name of Qualification: Dip Ed
Field of Study: Primary School Teaching
Institution: Uni of Tasmania
Trade Qualification: -----

5)
Name of Qualification: Master
Field of Study: Medical Engineering
Institution: Uni NSW
Trade Qualification: No

6)
Name of Qualification: Master Degree
Field of Study: Visual & Fine Arts
Institution: -----
Trade Qualification: -----

7)
Name of Qualification: City & Guilds
Field of Study: Bricklaying
Institution: City & Guilds
Trade Qualification: Yes

8)
Name of Qualification: Certificate in Architecture
Field of Study: Gardens and Grounds
Institution: -----
Trade Qualification: -----

9)
Name of Qualification: Associate Diploma
Field of Study: Architectural Technology and Practice
Institution: -----
Trade Qualification: -----

10) Name of Qualification: Diploma of Commerce
Field of Study: Secretarial Studies
Institution: Footscray College of TAFE
Trade Qualification: No

11) Name of Qualification:
Field of Study: Safety Engineering
Institution: Chisholm
Trade Qualification: -----

12) Name of Qualification: Dip
Field of Study: Nursing Teacher
Institution: -----
Trade Qualification: -----

13) Name of Qualification: Certificate
Field of Study: Intensive Care Nursing
Institution: -----
Trade Qualification: -----

14) Name of Qualification: Certificate
Field of Study: Gerontological and Community Health Nursing
Institution: -----
Trade Qualification: No

15) Name of Qualification: Graduate Diploma
Field of Study: Multicultural Studies
Institution: -----
Trade Qualification: No

16) Name of Qualification: Fellow Chartered Institute of Loss Adjusters
Field of Study: -----
Institution: -----
Trade Qualification: -----

17) Name of Qualification: Trade Certificate
Field of Study: Iron Moulding
Institution: -----
Trade Qualification: Yes

18) Name of Qualification: Certificate
Field of Study: Metal Pattern Making
Institution: Reid TAFE, ACT
Trade Qualification: Yes

19)
Name of Qualification: Post Grad Dip
Field of Study: Manipulative Therapy
Institution: Curtin Uni
Trade Qualification: -----

20)
Name of Qualification: Dip T
Field of Study: Deafness Education
Institution: -----
Trade Qualification: -----

21)
Name of Qualification: Advanced Cert
Field of Study: Broadcasting and Journalism
Institution: -----
Trade Qualification: -----

22)
Name of Qualification: Assoc Dip
Field of Study: Conservation & Natural Resource Management
Institution: -----
Trade Qualification: -----

23)
Name of Qualification: Bachelor of Administration
Field of Study: Nursing Management
Institution: -----
Trade Qualification: No

24)
Name of Qualification: BSc, LLB
Field of Study: -----
Institution: Uni of Sydney
Trade Qualification: -----

25)
Name of Qualification: BSc
Field of Study: Env Stud
Institution: Griffith Uni
Trade Qualification: -----

26)
Name of Qualification: B App Sc
Field of Study: Technology Studies & Chemistry
Institution: -----
Trade Qualification: No

27)
Name of Qualification: Certificate
Field of Study: Patisserie Decorating
Institution: -----
Trade Qualification: -----

28) Name of Qualification: Dip
Field of Study: Hothouse Plant Nursery
Institution: -----
Trade Qualification: Yes

29) Name of Qualification: Assoc Dip
Field of Study: Management
Institution: Bond Uni
Trade Qualification: -----

30) Name of Qualification: Adv Cert
Field of Study: Catering
Institution: -----
Trade Qualification: Yes

31) Name of Qualification: B Health Science
Field of Study: Nursing
Institution: Charles Sturt Uni
Trade Qualification: No

32) Name of Qualification: Bachelor of Commerce
Field of Study: Accounting & Finance
Institution: UC
Trade Qualification: No

33) Name of Qualification: Associate Diploma of Applied Science
Field of Study: Wilderness Reserves and Wildlife
Institution: Qld Agricultural College
Trade Qualification: No

34) Name of Qualification: Grad Dip
Field of Study: Statistics and Operations Research
Institution: -----
Trade Qualification: -----

35) Name of Qualification: Apiculture
Field of Study: Apiculture
Institution: Qld Agricultural College
Trade Qualification: No

1. INTRODUCTION

A query is a qualification response to which a code cannot be assigned using the procedures set out in the Training Guide. Query resolution is the process of assigning a code to a query.

In order to resolve qualification queries you must be familiar with the principles of the coding system, and with the conceptual basis and structure of ABSCQ. The conceptual basis, classification, structure and definitions for levels of attainment and fields of study are contained in the *Australian Bureau of Statistics Classification of Qualifications (ABSCQ)* (1262.0).

The *Coding Index: Numerical Order* (Part 5 of this publication) is sorted by field of study and then level of attainment, and is useful in the query resolution process. This index is used to verify that a particular code exists and, therefore, can be assigned to a response. It is also useful in considering potential fields of study for a query, and can be used in conjunction with the classification definitions in determining the correct field of study for the response.

2. QUERY RESOLUTION STRATEGY

The first step in query resolution is to repeat the coding process. This will determine whether the query is legitimate or is the result of coder error. If a code can be assigned using normal coding procedures, the steps used to assign the code should be noted and referred back to the coder. This will help to correct any misunderstandings concerning coding procedures. If a code cannot be assigned by repeating the coding process then it is necessary to use query resolution procedures.

The procedures for resolving queries involve relaxing the rules set out in the Training Guide. This allows alternative ways to be used to find an appropriate code for the response. As it is difficult to define set rules for solving queries, which by definition are atypical responses, effective query resolution depends greatly on the experience of the person resolving the queries. As you become more familiar with the classification you will find it easier to know where a particular response belongs. The final step is to verify, by checking with the classification, that the code assigned is reasonable.

A series of examples is used to show the different approaches that can be used to find a correct code. The examples demonstrate how the classification structure and definitions, and other reference materials can be used to resolve queries.

There are basically three reasons why a response cannot be coded by following the normal coding procedures:

i) where there is no basic word in the index that matches that given in the response;

ii) where there is no qualifying word that matches with the information given in a response and there are no default entries; and

iii) where the level of attainment given in the response cannot be matched with an index entry.

Sometimes, you may find that a legitimate qualification is missing from the index. This will occur with new qualifications. In these cases, contact the Classifications, Standards and Dissemination Section of the ABS (06) 252 5589 for advice on how to code the response. The coding index will be updated when necessary and users advised of the latest index amendments.

It is important to exercise care when coding a query to an 'other' or 'not elsewhere classified (nec)' category. These fields, ending in the digit '9', are allocated to known fields of study which may belong to a particular broad or narrow field of study, but which are not common enough to form a distinct narrow or detailed field of study. These categories should not be used to code a qualification if it is not clear where else it belongs. In these cases the qualification should be coded to a 'not further defined' category in either the broad or narrow field of study with which it can be definitely identified.

3. QUERY RESOLUTION PROCEDURES

As mentioned above, the first step in resolving queries is to repeat the coding procedures. If the response cannot be coded, use query resolution procedures.

3.1 No Match on Field of Study

Some queries will be the result of unusually described responses. In this section, we look at how the exact and close match rules can be relaxed to code those queries arising because there is no match on field of study.

3.1.1 *No Match on Basic Word*

When the basic word of a response cannot be matched, the *exact match on basic word* rule can be relaxed. Sometimes the basic word of a response can be modified to find another basic word of similar meaning. In other cases you may have to replace the given basic word with a synonym.

Example:

Name of Qualification:	BSc
Field of Study:	Neuropsychology

The basic word *neuropsychology* is not in the index but *psychology* is:

3411 Psychology/ Bachelor

Before assigning the code 3411 to this query, check that this code seems reasonable. *Neuropsychology* is defined as "the study of the **psychological** effects of organic brain disease" (*Oxford Companion to Medicine*, Vol II (N-Z), Oxford University Press 1986). Detailed Field 411 Psychology, is defined as "the study of causes and modification of behaviour...", and it seems reasonable for this response to be coded to this field, and the code 3411 assigned.

Example:

Name of Qualification:	PhD
Field of Study:	Electrophysiology

This is similar to the previous example. The single basic word *electrophysiology* cannot be found in the index. Look up *physiology* in the coding index:

1511 Physiology/ Doctorate

Again, before assigning the code, check that this code seems reasonable. *Electrophysiology* is "the science of electrical phenomena associated with living organisms" (*Chambers Dictionary of Science and Technology*, W & R Chambers Ltd 1974). Detailed Field 511 Biological Science, is defined as "the study of the **structure**, **function**, reproduction, growth, evolution and behaviour of living organisms". The code 1511 seems appropriate for this response.

Example:

Name of Qualification:	Logging
Field of Study:	Logging Timber

The basic word *logging* is not in the index. Look for words with a similar meaning to the basic word. Possible synonyms for logging are *woodsmanry*, *felling*, *forestry* and *lumbering*. *Woodsmanry* is in Detailed Field 697 Wood Machining and Turning, neither *felling* nor *lumbering* are in the index, and *forestry* is in Detailed Field 892 Forestry. The next step is to check the definitions for detailed fields 697 and 892 to see which, if either, is an appropriate place to code this response.

In the classification Detailed Field 697 Wood Machining and Turning, is described as "the study of shaping wood using various machines...". Detailed Field 892 Forestry, is defined as "the study of establishing, cultivating, harvesting and managing forests". Logging is more related to harvesting timber than to woodturning, therefore Detailed Field 892 is the correct field of study. There is no level of attainment given so a zero '0' is assigned for the level and the code 0892 is assigned to this response.

If the information in the response is very general it may be difficult to find an appropriate synonym.

Example:

Name of Qualification:	B App Sc
Field of Study:	Imaging

In the index there are only entries for *medical imaging*, and none of these are at the *bachelor* level of attainment. However, in this case, it is a good place to begin looking for an appropriate code. It is likely that this qualification is about radiography or x-ray techniques and may be related to *medical imaging*. Check the definitions of the relevant field of study, i.e. Detailed Field 234 Radiography. The definition states that this is "the study of technologies which use...for producing diagnostic images and administering radiation therapy". Next, check the numeric index under the field of study 234 to see if there are other similar qualifications at the bachelor level of attainment.

3234	Radiation, Medical/ Bachelor
3234	Radiography/ except above/ Bachelor
3234	Radiotherapy/ Bachelor

There are three entries with a level of attainment code '3', indicating that qualifications in this field of study do exist at the bachelor level. The code 3234 can be assigned to this query.

N.B. Do not assign a 4-digit code if it is not in the index, i.e. do not create new 4-digit codes. The only exceptions to this rule is assigning level codes '0' and '8', and adding trailing zeroes for field of study.

Example:

Name of Qualification:	Electrical Harness Traineeship
Field of Study:	maths, communication, electronics, graphics
Institution:	School of Mines, Ballarat

In this example the information given for the field of study question refers more to specific subjects studied rather than a main field of study for the qualification. The name of the qualification information appears more specific but cannot be found in the index. However, there is some information that can be used.

Electrical and electronic qualifications are found in Broad Field 6 Engineering. In this case there are three narrow fields that should be looked at: Narrow Field 63 Electrical and Electronic Engineering, Narrow Field 65 Metallurgical and Mining Engineering, and Narrow Field 69 Other Engineering. The response indicates that the qualification was gained from a mining school so Narrow Field 65 should be checked. Narrow Field 69 should also be checked as it contains a range of qualifications that do not belong in other fields.

After checking the definitions for the three narrow fields it appears that this qualification should be classified to Electrical and Electronic Engineering. Narrow Field 65 is concerned with the extraction of minerals and does not mention *electrical* at all. Narrow Field 69 also does not contain any fields of study that look appropriate for this response. Using a process of elimination we have concluded that this qualification belongs in Narrow Field 63 Electrical and Electronic Engineering.

Examine this narrow field further to see if the qualification fits into any specific detailed field. However, the information in the response is too general. We do not know if the qualification involves *fitting*, *installing* or *servicing* etc, so a detailed field cannot be selected. However, a narrow field code can be assigned and a trailing zero added. The field of study code then, is 630. Check the level by using the numeric index and look up the field 630. There are other *traineeship certificates* for this field of study so the level of attainment code '7' can be assigned to this query. Therefore, the 4-digit code assigned is 7630.

3.1.2 *No Match on Qualifying Word*

In some cases the basic word can be matched but qualifying words cannot (either exactly or closely) and there is no *except above* index entry. In those cases where an index entry requires an exact match, relax the exact match rule and try using synonyms or words with the same meaning, as in *3.1.1 No Match on Basic Word.*

Example:

Name of Qualification:	BSc
Field of Study:	Metallographic Engineering

In this example the basic word *engineering* can be matched. However, all the index entries, apart from the *NAI (about type of engineering)*, require exact matches on qualifying words and there is no *except above* entry. However, the following index entry may be a close match:

3651 Engineering, Metallurgical/ Bachelor

Check the meaning of *metallographic* (by using a dictionary or other reference material) and assign the code 3651 to the response.

Example:

Name of Qualification:	Polysomnographic technologist
Field of Study:	Sleep and sleep disorders

Some responses may contain words that are unfamiliar, such as the word *polysomnographic* in this example. If the word is not in any available dictionary, try using the other information given in the response to find a code. The possible alternatives are to use *sleep technologist* and *sleep disorders* as fields of study. However, in this case, no match can be found for either field of study.

The respondent has given the word *technologist*, so it is reasonable to assume that *polysomnographic* is some sort of technology or equipment used by a technologist. The information in the field of study indicates that the person has studied *sleep disorders*, so we might assume that the equipment is used in some medical capacity. The index can be checked again using the basic word *technology*, for entries that may be related to the response.

L592 Technology, Laboratory/ Level
L592 Technology, Medical/ except above/ Level

These entries may be related to the response and both are in Detailed Field 592 Laboratory Technology. The definition states that "Laboratory Technology is the study of laboratory techniques and equipment used in biological, chemical, medical and other laboratories". The field of study 592 may be an appropriate place to code this response. To verify this, look up 592 in the numeric index to check for similar qualifications.

L592 Measurement, Clinical/ Level
L592 Science, Medical Laboratory/ Level
L592 Technician, Laboratory/ Level
L592 Technician, Medical/ Level

These entries confirm that Detailed Field 592 Laboratory Technology, is the appropriate field for the response. No level information has been given so a zero '0' is assigned for the level. The code for this response is 0592.

It is important to exercise care when making assumptions about a qualification. Only use the information given to understand what a qualification is about. If a response is vague or ambiguous do not make assumptions unless there is other information, such as institution, that can be used to find out more about the qualification from external sources. Use dictionaries where possible to check the meaning of unfamiliar words and check the classification definitions carefully.

Example:

Name of Qualification:	Graduate Diploma in Industrial Management
Field of Study:	-----
Institution:	Swinburne Institute of Technology

In this example the basic word can be matched but the qualifying word cannot, and the *NAI (about type of management)* cannot be selected because there is additional information, i.e. *industrial*. The information given is too broad and vague to deduce anything about the field of study. The term *industrial management* may be related to industrial relations, to the management of an industrial plant, or to the technical side of industry. In this example, the institution information given can be followed up, either by contacting the institution and enquiring about the course, or by checking the handbook for that institution (most libraries keep copies of these). The *Swinburne Institute of Technology Handbook* (1988) lists a *Graduate Diploma in Industrial Management* offered by the Faculty of Engineering. The description of the course states that it is aimed at "...engineering graduates who wish to pursue a management career in industry". From this information it is clear that the qualification belongs in Broad Field 1 Business and Administration, and Narrow Field 11 Management. By checking the detailed field definitions, it appears that this qualification is best coded to Detailed Field 111 Business Management. The level given is *graduate diploma* which has a code of '2', so the correct code for this qualification is 2111. Check the numeric index to confirm that such a code exists, and then assign the code 2111 to this response.

Example:

Name of Qualification:	Certificate in Vocational Studies
Field of Study:	Health Assistant

The first step in resolving this query is to assign a field of study code if possible. The field of study is clearly defined, but is not codable through usual procedures. It is concerned with health and belongs in Broad Field 2 Health. However there is no further information in the response to enable coding to a narrow or detailed field of study. Therefore, it can only be coded to the broad field of study '200'.

The second step is to assign a level of attainment code if possible. *Certificate in vocational studies* is the title of a qualification and is codable using normal procedures. To code this level look up the basic word *studies* and the qualifying word *vocational* in the coding index.

7888 Studies, Vocational/ NAI (about field of study)/ Certificate

We can use the level code '7' and combine it with the field of study code '200'. Check that this code exists by looking in the numeric index before assigning the code 7200 to this response.

Example:

Name of Qualification:	Graduate Diploma of Urban Policy and Research
Field of Study:	Urban Policy

The field of study *urban policy* is not in the index and the other entries under the basic word *policy* do not appear related. Look for similar index entries using *research* as a basic word. For example:

2499 Research, Urban/ Graduate Diploma

The field of study *urban research* is included in the Detailed Field 499 Other Society and Culture, nec. Because there is no specific definition for this detailed field the numeric index should be checked for similar qualifications coded to the detailed field of study 499.

2499 Design, Urban/ Graduate Diploma
2499 Planning,Urban/ Graduate Diploma
2499 Research, Urban/ Graduate Diploma
2499 Studies, Urban/ Graduate Diploma

These entries indicate that the field of study 499 is correct and can be assigned for the level of attainment *graduate diploma*. Therefore, the code 2499 is assigned to this response.

Example:

Name of Qualification:	Bachelor of Applied Science
Field of Study:	Environmental Assessment and Land Use Policy

In this example the basic words *assessment* and *policy* are not particularly useful, so other information in the response should be used. *Environment* and *use* are possible basic words. For example:

7512 Use, Land/ Certificate

This entry is in Detailed Field 512 Environmental Science, which seems an appropriate field of study for this qualification. The next step is to look at the definition, which states that "Environmental Science is the study of the relationships between living organisms and the natural, rural, industrial and urban environments...". It seems reasonable that an *environmental assessment* qualification belongs in this field of study. This can be checked by looking in the numeric index under 512 and the level *bachelor*. There are many entries that are similar to the given qualification so we can be reasonably sure that the field of study 512 is correct. The code 3512 should be assigned to the response.

3.1.3 *Uncodable Field of Study*

Sometimes a response will contain information that is too vague or ambiguous to code. If there is no other information in the response which could be used as a field of study, then the field of study code '888' (uncodable) is assigned. The response should also be checked for level of attainment information which could be coded.

Example:

Name of Qualification:	Graduate Diploma
Field of Study:	Environment

The field of study in this response is vague and can mean different things such as *environmental science* (in Broad Field 5 Natural and Physical Sciences), or *built environment* (in Broad Field 7 Architecture and Building). Because of this ambiguity and the fact that there is no other field of study information to use, the field of study is uncodable and is assigned the code '888'. However, the level of attainment can be coded and the code 2888 assigned to this response.

Example:

Name of Qualification:	Advanced Certificate
Field of Study:	Field Construction and Maintenance

Here the level of attainment can be coded, however, the information in the field of study, *field construction and maintenance* is not very informative. This description could be related to agriculture, engineering or building. Therefore, the field of study is considered uncodable and assigned the code '888'. The 4-digit code for this response is 5888.

3.1.4 *Field of Study Not Stated*

Sometimes a response may state a level of attainment but no field of study. In most cases such responses can be coded using normal coding procedures (see *Part 2, Section 5.2 Missing Field of Study*). However, sometimes these responses may be raised as queries.

If a level is stated but no field of study is given, code the level if possible and assign zeroes '000' for the field of study. The following section explains how to deal with unusually described or unfamiliar levels of attainment.

3.2 No Match on Level of Attainment

Some responses have levels of attainment that are unfamiliar or ambiguous. Others will be known, but are not in the index for a particular index entry. These will be raised as queries by the coder. The level of attainment definitions should be used when considering the level code for a qualification. In addition, the level of a qualification may also be determined by referring to the entry requirements and length of courses found in institution handbooks.

3.2.1 *Equivalent ABSCQ Levels of Attainment*

Some ABSCQ level categories contain more than one qualification. For example, all associate diplomas, advanced certificates and certificates of technology are included in Level 5 Associate Diploma. This means that in terms of ABSCQ they have the same level of attainment.

In some cases, where an exact match cannot be made on one level of attainment, an equivalent level may sometimes be found. For example, if a match cannot be made on *advanced certificate* for a particular field of study, look within that field of study for other qualifications with the same ABSCQ level of attainment. Use the coding index and the level definitions to identify other qualifications with the same ABSCQ level of attainment.

It is important to remember that a 4-digit code can **only** be assigned to a response if it exists in the index.

Example:

Name of Qualification:	Associate Diploma
Field of Study:	Numerical Control

The field of study is codable under the basic word *control*, and there are three entries for the qualifying word *numerical.*

7631	Control, Numerical/ Certificate
5631	Control, Numerical/ Certificate of Technology
0641	Control, Numerical/ NAI (about level)

There is no match for *associate diploma* but the *certificate of technology* has an equivalent level of attainment code, i.e. '5' (this can be checked by looking up *associate diploma* in the coding index or the level definitions), therefore, the code 5631 can be assigned to this response.

Example:

Name of Qualification:	Technician Certificate
Field of Study:	Polymer Science

In this example the field of study can be matched under the basic word *science* and the qualifying word *polymer*. There are only two index entries.

2522	Science, Polymer/ Graduate Diploma
0522	Science, Polymer/ NAI (about level)

The correct field of study for this response is Detailed Field 522 Chemistry. However, the level of attainment given cannot be matched with either of the index entries. Check the coding index to find which level of attainment code is assigned to *technician certificates.*

5000	Certificate, Technician

The level code for this response is '5', and therefore the 4-digit code should be 5522. The next step is to verify that this code is in the index. Check the field of study 522 in the numeric index for entries with level of attainment '5'. In this case there are three entries.

5522	Chemistry/ Associate Diploma
5522	Chemistry/ Associateship
5522	Technology, Chemical/ Associate Diploma

The code 5522 can be assigned to this response.

If the particular level of attainment in a response or its equivalent is not in the index for a particular field of study then assign the level code '8' (uncodable) to the response.

There are cases where a code does not exist, i.e. a 4-digit code is not in the index. This is because research at the time the index was prepared, showed that there were no qualifications at that particular level of attainment for that particular field of study. In these cases, a level of attainment code cannot be assigned and the code '8' (uncodable) is used.

Example:

Name of Qualification:	Master of Applied Science
Field of Study:	Fire Technology

In this example the field of study *fire technology* is codable under the basic word *technology*, but there is no index entry for the level *master*. In the numeric index under the field 992 there is no equivalent level code (in this case a level of attainment of '1' is required). This means that the code 1992 does not exist, and so cannot be assigned to this response. The uncodable level '8' has to be assigned and the resulting code is 8992.

Example:

Name of Qualification:	Graduate Diploma in Aero-systems engineering
Field of Study:	Aero-systems engineering

A match can be made on the basic word *engineering*. *Aero-systems* is not in the index but both *aeronautical* and *aerospace engineering* are (Detailed Field 692 Aeronautical Engineering Science). By relaxing the *exact match on qualifying words following a comma (,)* rule, a close match can be made, and the field of study code 692 assigned to this response. However, there is no match for *graduate diploma*. The numeric index can be used to check for a level of attainment of '2' (the level of attainment code assigned to *graduate diploma*) within the field of study 692. This level of attainment is not available, therefore the uncodable level '8' is used, and the code 8692 assigned to the response.

3.2.2 *Ambiguous Levels of Attainment*

Sometimes a level of attainment may be ambiguous because it combines the wording of two different levels, and so is difficult to code correctly. For example, a response such as *associate graduate diploma* is difficult to code, as *associate diploma* and *graduate diploma* are both in the index but have different level of attainment codes. It would be incorrect to assume that the qualification was either one or the other of these so neither code can be used. Such a response should be assigned '8' for the level of attainment.

3.3 Overseas Qualifications

In general the most common qualifications from overseas, such as Bachelor of Arts, Bachelor of Science etc, can be coded to the Australian equivalents.

Example:

Name of Qualification:	Bachelor of Science
Field of Study:	Ocean Engineering
Institution:	Tian Gian University

This would be raised as a query because there is no match for the qualifying word *ocean*. It is incorrect to code to Detailed Field 694 Marine Engineering Science, even though *ocean* is sometimes equated with *marine*. It is not clear what is meant by the word *ocean* or what is involved in *ocean engineering* so code to the broad field only, i.e. '600'. The level of attainment is *bachelor*, i.e '3'. The code 3600 is assigned to this response.

Example:

Name of Qualification:	Associate of College of Preceptors, London School of College Teaching
Field of Study:	Teaching
Institution:	Avery Hill Training College, London

The basic word *teaching* is in the index, however none of the entries under *teaching* match the response. There are *except above* entries but no match can be made with the levels in the *except above* entries. There is no information on what kind of *teaching* was studied, therefore, code to the broad field only, i.e. '300'. The level is uncodable so the code 8320 is assigned to this response.

Example:

Name of Qualification:	Stimyologist B.A.
Field of Study:	B.A. in Stimyology
Institution:	Tibet Stimyology

In a query such as this, where the meaning of Stimyology cannot be determined, the code '888' is assigned for field of study. In Australia, the letters *B.A.* refer to the level *Bachelor of Arts*, however, in this case it is not known what these letters refer to. Therefore, the code '8' should be used for level, and a code of 8888 assigned to this response.

Example:

Name of Qualification:	Diplomate of American College of Theriologists
Field of Study:	Veterinary Reproduction
Institution:	University of Florida

The information in this response is ambiguous. The field of study *veterinary reproduction* could be coded to Detailed Fields 813 Animal Husbandry or 251 Veterinary Science. The word *theriology* refers to the study of mammals and could be coded to Detailed Field 511 Biological Science. Therefore, as it is not clear what is the more appropriate detailed field of study for this response, the code '888' should be assigned. The code '8' should be used for level of attainment as the word diplomate cannot be equated with an equivalent Australian qualification. The code 8888 is assigned to this response.

4. SUMMARY

There are few set rules in the query resolution process as, by their nature, queries are outside the standard coding procedures. However, query resolution can be carried out in a relatively systematic manner. The definitions for levels of attainment and fields of study are an essential reference tool in query resolution, and should be used in conjunction with the coding index to verify codes. Other helpful materials are dictionaries and educational institution handbooks.

Query Resolution Procedures

- Relax the exact match rule on basic and qualifying words and attempt to make a close match.
- Use synonyms for the basic and qualifying words.
- Look for as many alternatives for field of study as possible, and then eliminate the least appropriate options, until one or more appropriate field of study is found.
- Use the classification definitions and numerical index to confirm that the field of study is appropriate and reasonable for the response.
- Use the numerical index to verify that a 4-digit code exists, **before** assigning it to a response.
- If a level code does not exist for a particular field of study, assign the code '8' (uncodable) for level.
- If a field of study cannot be coded then assign the code '888' (uncodable) for the field of study.
- If both level of attainment and field of study are uncodable assign 8888 to the response.
- If no level has been stated then assign a zero '0' for level.
- If a level has been stated but there is no field of study in the response, code the level and assign '000' for field of study.

Points to Remember

- **Do not** assign codes that are not listed in the index (except for 'uncodable', 'not stated' or 'not further defined' codes).
- If in doubt about whether a narrow or detailed field of study code is appropriate, code to the broad or narrow field only rather than to an 'nec' category.
- Only use information about a qualification supplied in the response. Do not code on the basis of other information such as occupation.

If you require any further information or assistance in coding qualifications contact the Classifications, Standards and Dissemination Section of the ABS on (06) 252 5589.

ABSCQ MANUAL CODING SYSTEM

PART 6

SOLUTIONS TO CODING EXERCISES

Section 1.1

1) Basic word/s: Arboriculture
Qualifying word/s: none
Level/s: Advanced Certificate

5821 Arboriculture/ Advanced Certificate

Code assigned = 5821

2) Basic word/s: Care
Qualifying word/s: Residential
Level/s: Associate Diploma

5429 Care, Residential/ Associate Diploma

Code assigned = 5429

3) Basic word/s: Hairdressing
Qualifying word/s: none
Level/s: Trade Certificate

6911 Hairdressing/ Trade Certificate

Code assigned = 6911

4) Basic word/s: Relations
Qualifying word/s: Public
Level/s: Graduate Diploma

2492 Relations, Public/ Graduate Diploma

Code assigned = 2492

5) Basic word/s: Locksmithing
Qualifying word/s: none
Level/s: Certificate

7648 Locksmithing/ Certificate

Code assigned = 7648

6) Basic word/s: Reproduction
Qualifying word/s: Graphic
Level/s: Apprenticeship

6662 Reproduction, Graphic/ Apprenticeship

Code assigned = 6662

7) Basic word/s: Physics
Qualifying word/s: none
Level/s: Master

1521 Physics/ Master

Code assigned = 1521

8) Basic word/s: Librarianship
Qualifying word/s: School
Level/s: Graduate Diploma

2314 Librarianship/ school/ Graduate Diploma

Code assigned = 2314

9) Basic word/s: Operation
Qualifying word/s: Fisheries
Level/s: Certificate of Technology

5891 Operation, Fisheries/ Certificate of Technology

Code assigned = 5891

10) Basic word/s: Metallurgy
Qualifying word/s: none
Level/s: Bachelor

3651 Metallurgy/ Bachelor

Code assigned = 3651

11) Basic word/s: Studies
Qualifying word/s: Police
Level/s: Bachelor

3494 Studies, Police/ Bachelor

Code assigned = 3494

12) Basic word/s: Oceanography
Qualifying word/s: none
Level/s: Doctorate

1523 Oceanography/ Doctorate

Code assigned = 1523

13) Basic word/s: Technology
Qualifying word/s: Dental
Level/s: Advanced Certificate

5243 Technology, Dental/ Advanced Certificate

Code assigned = 5243

14) Basic word/s: Dancing
Qualifying word/s: none
Level/s: Associate Diploma

5486 Dancing/ Associate Diploma

Code assigned = 5486

15) Basic word/s: Therapy
Qualifying word/s Occupational
Level/s: Bachelor

3233 Therapy, Occupational/ Bachelor

Code assigned = 3233

Section 1.2

1) Basic word/s: Studies
Qualifying word/s: Pacific Defence
Level/s: Bachelor

3888 Studies, Defence/ Bachelor

Pacific is extraneous

Code assigned = 3888

2) Basic word/s: AFAMI
Qualifying word/s: none
Level/s: none

7132 AFAMI

Code assigned = 7132

3) Basic word/s: Science
Qualifying word/s: Biological
Level/s: Doctor of Philosophy

1511 Science, Biological/ Doctorate

Doctor of Philosophy = Doctorate

Code assigned = 1511

4) Basic word/s: Midwifery
Qualifying word/s: none
Level/s: Grad Dip

2222 Midwifery/ Graduate Diploma

Grad Dip = Graduate Diploma

Code assigned = 2222

5) Basic word/s: Science
Qualifying word/s: Computer
Level/s: Bachelor (Honours)

3541 Science, Computer/ Bachelor

Honours is extraneous

Code assigned = 3541

6) Basic word/s: Geology
Qualifying word/s: Coal
Level/s: Graduate Diploma

2523 Geology/ Graduate Diploma

Coal is extraneous

Code assigned = 2523

7) Basic word/s: Design
Qualifying word/s: Interior
Level/s: M

1712 Design, Interior/ Master

M = Master

Code assigned = 1712

8) Basic word/s: AmusA
Qualifying word/s: none
Level/s: none

9989 AmusA

Code assigned = 9989

9) Basic word/s: Management
Qualifying word/s: Office
Level/s: Post Grad Dip

2121 Management, Office/ Graduate Diploma

Post Grad Dip = Graduate Diploma

Code assigned = 2121

10) Basic word/s: CRTS
Qualifying word/s: none
Level/s: Trade Cert

6888 CRTS/ Trade Certificate

Trade Cert = Trade Certificate

Code assigned = 6888

11) Basic word/s: Care
Qualifying word/s: Child
Level/s: Traineeship

7422 Care, Child/ Traineeship Certificate

Traineeship = Traineeship Certificate

Code assigned = 7422

12) Basic word/s: Growing
Qualifying word/s: Small Fruits
Level/s: Grad Dip

2821 Growing, Fruit/ Graduate Diploma

Small is extraneous
Grad Dip = Graduate Diploma

Code assigned = 2821

13) Basic word/s: Floristry
Qualifying word/s: Commercial
Level/s: Certificate

7489 Floristry/ Certificate

Commercial is extraneous

Code assigned = 7489

14) Basic word/s: Viticulture
Qualifying word/s: none
Level/s: Assoc Dip

5821 Viticulture/ Associate Diploma

Assoc Dip = Associate Diploma

Code assigned = 5821

15) Basic word/s: Culture
Qualifying word/s: Islamic
Level/s: B

3449 Culture/ Bachelor

Islamic is extraneous
B = Bachelor

Code assigned = 3449

Section 2.2

1) Basic word/s: Engineering
Qualifying word/s: Road
Level/s: Graduate Diploma

Query

Exact match *engineering*
No exact match for *road* and no appropriate close match index entries

Query

2) Basic word/s: Display
Qualifying word/s: Advertising
Level/s: Certificate

7139 Display/ promotional/ Certificate

Exact match *display*
Close match *advertising* with *promotional*

Code assigned = 7139

3) Basic word/s: Tuning
Qualifying word/s: Auto
Level/s: Apprenticeship

6672 Tuning/ engine/ Apprenticeship

Exact match *tuning*
Close match *auto* with *engine*

Code assigned = 6672

4) Basic word/s: Inspection
Qualifying word/s: Aeroplane
Level/s: Certificate

Query

Exact match *inspection*
No exact match for *aeroplane* and no close match entries

Code assigned = Query

5) Basic word/s: Making
Qualifying word/s: Cast Iron Furniture
Level/s: Trade Cert

6649 Making, Furniture/ metal/ Trade Certificate

Exact match *making*
Exact match *furniture*
Close match *cast iron* with *metal*

Code assigned = 6649

6) Basic word/s: Health
Qualifying word/s: Environmental
Level/s: Fellow

3299 Health, Environmental/ Fellow

Exact match *health* and *environmental*

Code assigned = 3299

7) Basic word/s: Systems
Qualifying word/s: Building Energy
Level/s: Master

1719 Systems, Building Energy/ Master

Exact match *systems* and *building energy*

Code assigned = 1719

8) Basic word/s: Surgery
Qualifying word/s: Animal
Level/s: Bachelor

3251 Surgery/ veterinary/ Bachelor

Exact match *surgery*
Close match *animal* with *veterinary*

Code assigned = 3251

9) Basic word/s: Economics
Qualifying word/s: Agricultural
Level/s: Diploma

2461 Economics/ agricultural/ Diploma

Exact match *economics*
Match on agricultural (can match exactly even though the index entry allows for close matching if it were necessary)

Code assigned = 2461

Section 2.3

1) Basic word/s: Agriculture
Qualifying word/s: none
Level/s: Diploma

4811 Agriculture/ except above/ Diploma

Code assigned = 4811

2) Basic word/s: Making
Qualifying word/s: Vehicle Body
Level/s: none

0675 Making, Vehicle Body/ NAI (about level)

Code assigned = 0675

3) Basic word/s: Drafting
Qualifying word/s: Design
Level/s: Certificate of Technology

5600 Drafting, Design/ NAI (about type of design drafting)/ Certificate of Technology

Code assigned = 5600

4) Basic word/s: Administration
Qualifying word/s: none
Level/s: Associate Diploma

5110 Administration/ NAI (about type of administration)/ Associate Diploma

Code assigned = 5110

5) Basic word/s: Secretarial
Qualifying word/s: none
Level/s: Diploma

7122 Secretarial/ NAI (about type of secretarial)/ Diploma/ except above

There is no institution information given, so select *except above*

Code assigned = 7122

6) Basic word/s: Midwifery
Qualifying word/s: none
Level/s: Certificate

3222 Midwifery/ except above

No index entry for *certificate*, so *except above* must be selected

Code assigned = 3222

7) Basic word/s: Architecture
Qualifying word/s: none
Level/s: Bachelor

3711 Architecture/ except above/ Bachelor

No information is given about the type of architecture studied so *except above* must be selected

Code assigned = 3711

8) Basic word/s: Aesthetics
Qualifying word/s: none
Level/s: Doctorate

1452 Aesthetics/ except above/ Doctorate

No information is given that suggests *art* can be selected so *except above* must be selected

Code assigned = 1452

9) Basic word/s: Assisting
Qualifying word/s: Survey
Level/s:: none

0611 Assisting, Survey/ NAI (about level)

Code assigned = 0611

10) Basic word/s: Commerce
Qualifying word/s: none
Level/s: Bachelor

3100 Commerce/ NAI (about type of commerce)/ Bachelor

Code assigned = 3100

11) Basic word/s: Officer
Qualifying word/s: Welfare
Level/s: none

0420 Officer, Welfare/ NAI (about level)

Code assigned = 0420

12) Basic word/s: Gynaecology
Qualifying word/s: none
Level/s: PhD

1214 Gynaecology/ except above

PhD = Doctorate
No index entry for *Doctorate* so select *except above*

Code assigned = 1214

13) Basic word/s: Pathology
Qualifying word/s: none
Level/s: Master

1216 Pathology/ NAI (about type of pathology)/ Master

Code assigned = 1216

Section 2.4

1) Basic word/s: Algebra
Qualifying word/s: Linear
Level/s: Bachelor

???? Algebra: code to Mathematics
3531 Mathematics/ Bachelor

Code assigned = 3531

2) Basic word/s: Instruction
Qualifying word/s: Aerobic
Level/s: Certificate

???? Instruction, Aerobic: code to Fitness
7239 Fitness/ Certificate

Code assigned = 7239

3) Basic word/s: Painting
Qualifying word/s: Carriage
Level/s: none

???? Painting, Carriage: code to Painting, Automotive
0674 Painting, Automotive/ NAI (about level)

Code assigned = 0674

4) Basic word/s: Japanese
Qualifying word/s: none
Level/s: Grad Dip

???? Japanese: code to Languages
2442 Languages/ Graduate Diploma

Code assigned = 2442

Section 3.1

1) Basic word/s: Education
Qualifying word/s: Physical
Level/s: Diploma of Teaching

4310 Education, Physical/ Diploma of Teaching (Dip T)

Both *education* and *teaching* are used
The basic word is the one used in the field of study i.e. *education*

Code assigned = 4310

2) Basic word/s: Teaching
Qualifying word/s: Music
Level/s: Diploma of Education

2313 Teaching, Music/ Diploma of Education (Dip Ed)

Both *education* and *teaching* are used
The basic word is the one used in the field of study i.e. *teaching*

Code assigned = 2313

3) Basic word/s: Education
Qualifying word/s: French, German
Level/s: Diploma of Education

2310 Education/ except above/ Diploma of Education (Dip Ed)

Only *education* is used so it is the basic word.
No match for *French* or *German* so *except above* is selected

Code assigned = 2310

4) Basic word/s: Nursing
Qualifying word/s: none
Level/s: Enrolled

7221 Nursing/ NAI (about type of nursing)/ Enrolled (EN)

Code assigned = 7221

5) Basic word/s: Nursing
Qualifying word/s: Psychiatric
Level/s: Registered

4224 Nursing, Psychiatric/ Registered

Code assigned = 4224

6) Basic word/s: Nursing
Qualifying word/s: Midwifery
Level/s: Postgraduate Dip

2222 Nursing, Midwifery/ Graduate Diploma

Postgraduate Dip = Graduate Diploma

Code assigned = 2222

7) Basic word/s: Management
Qualifying word/s: Library Information
Level/s: Bachelor

3431 Management, Information/ library/ Bachelor

Code assigned = 3431

8) Basic word/s: Administration
Qualifying word/s: Public
Level/s: Bachelor

3112 Administration, Public/ Bachelor

Administration takes precedence over all other words except for *aide* so it is the basic word.

Code assigned = 3112

9) Basic word/s: Teacher
Qualifying word/s: Librarianship
Level/s: Dip Ed

2314 Teaching, Librarianship/ Diploma of Education (Dip Ed)

The basic word is either *teaching* or *education* as they take precedence over all other words except *aide*, and *administration* and *management* in the hierarchy of basic words
Both *education* and *teaching* are used so the basic word is the one used in the field of study, i.e. *teaching*

Code assigned = 2314

10) Basic word/s: Administration
Qualifying word/s: Educational
Level/s: PhD

1112 Administration, Educational/ Doctorate

Administration takes precedence over *education* in the hierarchy of basic words

Code assigned = 1112

11) Basic word/s: Nurse
Qualifying word/s: Dental
Level/s: Registered

7242 Nursing, Dental/ Registered

Code assigned = 7242

12) Basic word/s: Nursing
Qualifying word/s: History of
Level/s: PhD

1414 Nursing, History of/ Doctorate

Code assigned = 1414

13) Basic word/s: Aide
Qualifying word/s: Nursing
Level/s: none

7221 Aide, Nursing

Aide takes precedence over *nursing* in the hierarchy of basic words

Code assigned = 7221

14) Basic word/s: Education
Qualifying word/s: Nursing
Level/s: Bachelor

3322 Education, Nursing/ Bachelor

Education takes precedence over *nursing* in the hierarchy of basic words

Code assigned = 3322

15) Basic word/s: Aide
Qualifying word/s: Teachers
Level/s: none

9989 Aide, Teachers

Aide takes precedence over *teaching* in the hierarchy of basic words

Code assigned = 9989

16) Basic word/s: Administration
Qualifying word/s: Nursing
Level/s: Graduate Diploma

2112 Administration, Nursing/ Graduate Diploma

Administration takes precedence over *nursing* in the hierarchy of basic words

Code assigned = 2112

17) Basic word/s: Education
Qualifying word/s: Sociology of
Level/s: MA

1412 Education, Sociology of/ Master

Code assigned = 1412

18) Basic word/s: Management
Qualifying word/s: Office
Level/s: Certificate

7121 Management, Office/ Certificate

Both *management* and *administration* are used so the basic word is the one used in the field of study, i.e. *management*

Code assigned = 7121

Section 3.2

1) Basic word/s: Surveying
Qualifying word/s: Quantity
Level/s: Bachelor

3793 Surveying/ quantity/ Bachelor

Applied Science is vague

Code assigned = 3793

2) Basic word/s: Finance
Qualifying word/s: none
Level/s: Master

1142 Finance/ Master

Commerce is vague

Code assigned = 1142

3) Basic word/s: Literature
Qualifying word/s: none
Level/s: Master

1441 Literature/ Master

Humanities is vague

Code assigned = 1441

4) Basic word/s: Relations
Qualifying word/s: Public
Level/s: Assoc Dip

5492 Relations, Public/ Associate Diploma

Business is vague

Code assigned = 5492

5) Basic word/s: Leadership
Qualifying word/s: Recreation
Level/s: Associate Diploma

5493 Leadership/ recreation/ Associate Diploma

Arts is vague

Code assigned = 5493

6) Basic word/s: Science
Qualifying word/s: Numerical
Level/s: Bachelor

3531 Science, Numerical/ Bachelor

Science is not vague as it is qualified by another word and forms a legitimate field of study

Code assigned = 3531

7) Basic word/s: MEng
Qualifying word/s: Civil Engineering
Level/s: M

1621 Engineering, Civil/ Master

Eng is a common abbreviation for *engineering*
Engineering is not vague as it is qualified by another word and forms a legitimate field of study

Code assigned = 1621

Section 3.3

1) Basic word/s: Education
Qualifying word/s: Secondary
Level/s: Bachelor & Trade Certificate

Query

No level *trade certificate* for *secondary education*

Query

2) Basic word/s: Engineering
Qualifying word/s: Steam
Level/s: Apprenticeship & Trade Certificate

6672 Engineering, Steam/ Apprenticeship
6672 Engineering, Steam/ Trade Certificate

Match both levels

Code assigned = 6672

3) Basic word/s: Electrician
Qualifying word/s: Auto
Level/s: Advanced Certificate & Trade Certificate

5634 Electrician/ Automotive/ Advanced Certificate
6634 Electrician/ Automotive/ Trade Certificate

Close match *auto* with *automotive*
Match both levels and code to highest qualification (i.e lowest first digit)

Code assigned = 5634

4) Basic word/s: Leadlighting
Qualifying word/s: none
Level/s: Certificate & Trade Certificate

Query

There is no index entry *certificate* for *leadlighting*

Query

5) Basic word/s: Mechanics
Qualifying word/s: none
Level/s: Trade Certificate

6600 Mechanics/ NAI (about type of mechanics)/ Trade Certificate

Engineering is vague so *mechanics* is used as the basic word
No level is stated but there is a *yes* for the trade qualification question = *trade certificate*

Code assigned = 6600

6) Basic word/s: Technician
Qualifying word/s: Electronic Instrument
Level/s: Certificate & Trade Certificate

7638 Technician, Electronic Instrument/ Certificate
6638 Technician, Electronic Instrument/ Trade Certificate

Match both levels and code to highest qualification

Code assigned = 6638

7) Basic word/s: Sheetmetal
Qualifying word/s: none
Level/s: 1st Class Certificate & Trade Certificate

6644 Sheetmetal/ Trade Certificate
6644 Sheetmetal/ 1st Class

1st Class Certificate = 1st Class
Match both levels

Code assigned = 6644

8) Basic word/s: Fabrication
Qualifying word/s: Metal
Level/s: City and Guilds & Trade Certificate

6645 Fabrication, Metal/ City and Guilds
6645 Fabrication, Metal/ Trade Certificate

Match both levels

Code assigned = 6645

9) Basic word/s: Plotting
Qualifying word/s: Radar
Level/s: Associate Diploma & Trade Certificate

5930 Plotting, Radar/ Associate Diploma
6930 Plotting, Radar/ Trade Certificate

Match both levels and code to the highest qualification

Code assigned = 5930

10) Basic word/s: Bookbinder
Qualifying word/s: none
Level/s: Trade Certificate

6664 Bookbinding/ Trade Certificate

Bookbinder = bookbinding
No level is stated but there is a *yes* for the trade qualification question = *trade certificate*

Code assigned = 6664

11) Basic word/s: Refrigeration
Qualifying word/s: none
Level/s: Trade Certificate

6635 Refrigeration/ Trade Certificate

Trade does not necessarily mean *trade certificate* but this respondent also answered *yes* to the trade qualification question

Code assigned = 6635

12) Basic word/s: Therapy
Qualifying word/s: Beauty
Level/s: Diploma & Trade Certificate
Institution: Tas TAFE

4912 Therapy, Beauty/ Diploma/ from a TAFE or technical college
6912 Therapy, Beauty/ Trade Certificate

Match both levels and code to highest qualification
Institution information is used to select the correct entry for *diploma*

Code assigned = 4912

13) Basic word/s: Signwriting
Qualifying word/s: none
Level/s: Pre-apprenticeship & Trade Certificate

7724 Signwriting/ Pre-apprenticeship
6724 Signwriting/ Trade Certificate

Match both levels and code to highest qualification

Code assigned = 6724

14) Basic word/s: Setting
Qualifying word/s: Die
Level/s: Trade Certificate

6643 Setting, Die/ Trade Certificate

No level is stated but there is a *yes* for the trade qualification question = *trade certificate*

Code assigned = 6643

Section 4.1

1) Basic word/s: Fabrication and Welding
Qualifying word/s: none
Level/s: Pre-apprenticeship Certificate

7645 Fabrication + Welding/ Pre-apprenticeship

Code assigned = 7645

2) Basic word/s: Tiling and Slating
Qualifying word/s: none
Level/s: Apprenticeship

6727 Tiling + Slating/ Apprenticeship

Code assigned = 6727

3) Basic word/s: Secretarial and Reception
Qualifying word/s: none
Level/s: none

7120 Secretarial + Reception

Level is extraneous

Code assigned = 7120

4) Basic word/s: Pastry and Cake
Qualifying word/s: none
Level/s: Trade Certificate

6922 Cake + Pastry/ Trade Certificate

Not in index under *Pastry + Cake* so reverse the order

Code assigned = 6922

5) Basic word/s: Speech and Drama
Qualifying word/s: none
Level/s: Graduate Diploma

2486 Speech + Drama/ Graduate Diploma

Code assigned = 2486

Section 4.2

1) Basic word/s: Accounting, Administration
Qualifying word/s: Personnel (for *administration*)
Level/s: Bachelor

3141 Accounting/ except above/ Bachelor
3113 Administration, Personnel/ Bachelor

Business is vague
Same broad field but different narrow field, therefore, code to broad field

Code assigned = 3100

2) Basic word/s: Drafting
Qualifying word/s: Jig, Tool
Level/s: Certificate

7642 Drafting, Jig/ Certificate
7642 Drafting, Tool/ Certificate

Both fields of study lead to same code

Code assigned = 7642

3) Basic word/s: Engineering
Qualifying word/s: Civil, Computer
Level/s: Diploma

4621 Engineering, Civil/ Diploma
No level for diploma under computer engineering

As one level is not in the index the response must be queried

Query

4) Basic word/s: Administration, Policy
Qualifying word/s: Public (for *policy*)
Level/s: Graduate Diploma

2112 Policy, Public/ Graduate Diploma
2110 Administration/ NAI (about type of administration)/ Graduate Diploma

Fields of study are nested, therefore, assign the more detailed code

Code assigned = 2112

5) Basic word/s: Planning
Qualifying word/s: Urban, Regional
Level/s: Postgraduate Dip

2499 Planning, Urban/ Graduate Diploma
2499 Planning, Regional/ Graduate Diploma

Both fields of study lead to same code

Code assigned = 2499

6) Basic word/s: Relations, Reception
Qualifying word/s: Public (for *relations*)
Level/s: Certificate

7492 Relations, Public/ Certificate
7129 Reception/ Certificate

Different broad fields but same level of attainment, code to first named field of study

Code assigned = 7492

7) Basic word/s: Science, Medicine
Qualifying word/s: Sports
Level/s: Bachelor

3239 Science, Sport/ Bachelor
3219 Medicine, Sports

Same broad field but different narrow field, therefore, code to broad field

Code assigned = 3200

8) Basic word/s: Environment, Architecture
Qualifying word/s: Built (for *environment*)
Level/s: B

3710 Environment, Built/ Bachelor
3711 Architecture/ except above/ Bachelor

Fields are nested,therefore, code to the more detailed field

Code assigned = 3711

9) Basic word/s: Fitting, Mechanics
Qualifying word/s: Fuel Injection (for *fitting*)
Level/s: Trade Certificate

6672 Fitting, Fuel Injection/ Trade Certificate
6600 Mechanics/NAI (about type of mechanics) Trade Certificate

Fields are nested, code to the more detailed field of study

Code assigned = 6672

10) Basic word/s: Science, Husbandry
Qualifying word/s: Veterinary (for *science*), Animal (for *husbandry*)
Level/s: Bachelor

3251 Science, Veterinary/ Bachelor
3813 Husbandry, Animal/ Bachelor

Different broad fields, therefore, code to first named qualification

Code assigned = 3251

Section 4.3

1) Basic word/s: Design, Teaching
Qualifying word/s: Wood, Secondary School
Level/s: Associate Diploma, Dip T

5482 Design, Wood/ Associate Diploma
4313 Teaching, Secondary/ Diploma of Teaching (Dip T)

Applied design is a vague field of study, use the more detailed field of study for the first qualification, i.e. *wood design*
School is extraneous
Match both levels and code to the highest qualification

Code assigned = 4313

2) Basic word/s: Literature, Research
Qualifying word/s: English, Social
Level/s: Bachelor, Grad Dip

3441 Literature/ Bachelor
2400 Research, Social/ Graduate Diploma

Match both levels and code to the highest qualification

Code assigned = 2400

3) Basic word/s: Management, Orcharding
Qualifying word/s: Agricultural (for *management*)
Level/s: Grad Dip, Certificate

2811 Management, Agricultural/ Graduate Diploma
7821 Orcharding/ Certificate

Match both levels and code to highest qualification

Code assigned = 2811

4) Basic word/s: Studies, Psychology
Qualifying word/s: Drug Dependence (for *studies*)
Level/s: G Dip, M

2429 Studies, Drug Dependence/ Graduate Diploma
1411 Psychology/ Master

Match both levels and code to highest qualification

Code assigned = 1411

5) Basic word/s: Studies, Education
Qualifying word/s: Renaissance (for *studies*), philosophy of (for *education*)
Level/s: MA, Ph.D

1449 Studies, Renaissance/ Master
1452 Education, Philosophy of/ Doctorate

Two qualifications but have the same level code - assign that level
Same broad field, different narrow field, code to broad field

Code assigned = 1400

Section 5.1

1) Basic word/s: Doctoring
Qualifying word/s: Saw
Level/s: none

6648 Doctoring/ Saw

Level is extraneous

Code assigned = 6648

2) Basic word/s: Logic
Qualifying word/s: none
Level/s: none

Need a qualifying word to select appropriate field of study, therefore cannot code this response

Query

3) Basic word/s: Administration
Qualifying word/s: Insurance
Level/s: none

No *NAI* or *except above* entry, use field of study code '143' and assign zero '0' for level

Code assigned = 0143

4) Basic word/s: Technology
Qualifying word/s: Welding
Level/s: none

Cannot assign field of study code without level information, therefore cannot code this response

Query

5) Basic word/s: Tectonics
Qualifying word/s: none
Level/s: none

No *NAI* or *except above* entry, use field of study code '523' and assign zero '0' for level

Code assigned = 0523

6 Basic word/s: Planning
Qualifying word/s: Social
Level/s: none

No *NAI* or *except above* entry, use field of study code '499' and assign zero '0' for level

Code assigned = 0499

7) Basic word/s: Medicine
Qualifying word/s: Renal
Level/s: Fellow

1218 Medicine, Renal

Level information is extraneous

Code assigned = 1218

8) Basic word/s: Nursing
Qualifying word/s: Critical Care
Level/s: Certificate

3229 Nursing, Critical Care

Level information is extraneous

Code assigned = 3229

9) Basic word/s: Making
Qualifying word/s: Hat
Level/s: none

6682 Making, Hat

Level information is extraneous

Code assigned = 6682

10) Basic word/s: Science
Qualifying word/s: Animal
Level/s: none

Cannot select field of study without level information

Query

Section 5.2

1) Basic word/s: Certificate
Qualifying word/s: Pre-vocational

7000 Certificate, Pre-vocational

Code assigned = 7000

2) Basic word/s: Pre-apprenticeship
Qualifying word/s: none

7000 Pre-apprenticeship

Code assigned = 7000

3) Basic word/s: Degree
Qualifying word/s: Bachelor

3000 Degree, Bachelor

Code assigned = 3000

4) Basic word/s: HNC
Qualifying word/s: none

5000 HNC

Code assigned = 5000

5) Basic word/s: PhD
Qualifying word/s: none

1000 PhD

Code assigned = 1000

Section 6

1) Basic word/s: Composing
Qualifying word/s: Music
Level/s: Bachelor

???? Composing: code to Composition
3481 Composition/ musical/ Bachelor

Close match *music* with *musical*

Code assigned = 3481

2) Basic word/s: Div
Qualifying word/s: none
Level/s: D

???? Div: code to Divinity
1451 Divinity/ Doctorate

D = Doctorate

Code assigned = 1451

3) Basic word/s: Sport, Exercise
Qualifying word/s: none
Level/s: Assoc Dip

5239 Sport/ Associate Diploma
5239 Exercise/ Associate Diploma

Applied Science is vague
Both basic words lead to the same code

Code assigned = 5239

4) Basic word/s: Teaching
Qualifying word/s: Primary School
Level/s: Dip Ed

2312 Teaching, Primary/ Diploma of Education (Dip Ed)

School is extraneous
Both teaching and *education* are used. The basic word is the one used in the field of study, i.e. *teaching*

Code assigned = 2312

5) Basic word/s: Engineering
Qualifying word/s: Medical
Level/s: Master

There is no qualifying word *medical* for *engineering*
All entries are exact match entries, (i.e. all have commas ',' before the qualifying words) and so cannot be closely matched

Query

6) Basic word/s: Arts
Qualifying word/s: Visual, Fine
Level/s: Master

1482 Arts, Fine/ Master
1480 Arts, Visual/ Master

Fields of study are nested, therefore, assign the more detailed code

Code assigned = 1482

7) Basic word/s: Bricklaying
Qualifying word/s: none
Level/s: City & Guilds, Trade Certificate

6723 Bricklaying/ City and Guilds
6723 Bricklaying/ Trade Certificate

Match both levels

Code assigned = 6723

8) Basic word/s: Architecture
Qualifying word/s: Gardens and grounds
Level/s: Certificate

6719 Architecture/ landscape/ Certificate

Close match *gardens and grounds* with *landscape*

Code assigned = 6719

9) Basic word/s: Technology, Practice
Qualifying word/s: Architectural (for both)
Level/s: Associate Diploma

5700 Technology, Architectural/ Associate Diploma
5711 Practice, Architectural/ Associate Diploma

Fields are nested, therefore, assign the more detailed code

Code assigned = 5711

10) Basic word/s: Studies
Qualifying word/s: Secretarial
Level/s: Diploma
Institution: Footscray TAFE College

7122 Studies, Secretarial/ Diploma/ except above

Commerce is vague
Qualification was not gained from a University or CAE , i.e. *except above* must be selected from the *Diploma* entries

Code assigned = 7122

11) Basic word/s: Engineering
Qualifying word/s: Safety
Level/s: none

0693 Engineering, Safety/ NAI (about level)

Code assigned = 0693

12) Basic word/s: Teacher
Qualifying word/s: Nursing
Level/s: Dip

4322 Teaching, Nursing/ Diploma

Teacher can be matched with *teaching*
Teaching takes precedence over *nursing* in the hierarchy of basic words

Code assigned = 4322

13) Basic word/s: Nursing
Qualifying word/s: Intensive Care
Level/s: Certificate

3229 Nursing, Intensive Care

Level is extraneous

Code assigned = 3229

14) Basic word/s: Nursing
Qualifying word/s: Gerontological, Community Health
Level/s: Certificate

3229 Nursing, Gerontological/ except above
3225 Nursing, Community Health/ except above

Code both fields of study
Same broad and narrow field but different detailed fields, therefore, code to the narrow field
Level is extraneous

Code assigned = 3220

15) Basic word/s: Studies
Qualifying word/s: Multicultural
Level/s: Graduate Diploma

2499 Studies, Multicultural/ Graduate Diploma

Code assigned = 2499

16) Basic word/s: Adjusters
Qualifying word/s: Loss
Level/s: Fellow
Institution: Chartered Institute of Loss Adjusters

8143 Adjusters, Loss/ Chartered Institute/ Fellow

Institution information is needed to code the response

Code assigned = 8143

17) Basic word/s: Moulding
Qualifying word/s: Iron
Level/s: Trade Certificate

6646 Moulding/ metal/ Trade Certificate

Close match *iron* with *metal*

Code assigned = 6646

18) Basic word/s: Making
Qualifying word/s: Metal Pattern
Level/s: Certificate, Trade Certificate

7646 Making, Pattern/ except above/ Certificate
6646 Making, Pattern/ except above/ Trade Certificate

Metal does not match with either *clothing* or *fashion* so *except above* is selected
Match both levels and code to highest qualification

Code assigned = 6646

19) Basic word/s: Therapy
Qualifying word/s: Manipulative
Level/s: Post Grad Dip

2232 Therapy, Manipulative/ Graduate Diploma

Code assigned = 2232

20) Basic word/s: Education
Qualifying word/s: Deafness
Level/s: Dip T

4392 Education, Deafness/ Diploma of Teaching (Dip T)

Both *education* and *teaching* are used. The basic word is the one used in the field of study i.e. *education*

Code assigned = 4392

21) Basic word/s: Broadcasting, Journalism
Qualifying word/s: none
Level/s: Advanced Cert

???? Broadcasting + Journalism: code to Broadcasting
5492 Broadcasting/ Advanced Certificate

Code assigned = 5492

22) Basic word/s: Conservation, Management
Qualifying word/s: Natural Resource (for *management*)
Level/s: Assoc Dip

5512 Conservation/ NAI (about type of conservation)/ Associate Diploma
5512 Management, Natural Resource/ Associate Diploma

Both fields of study lead to the same code

Code assigned = 5512

23) Basic word/s: Management
Qualifying word/s: Nursing
Level/s: Bachelor

3112 Management, Nursing/ Bachelor

Administration and *management* take precedence over *nursing* in the hierarchy of basic words
As both are used, the basic word is the one used in the field of study i.e. *management*

Code assigned = 3112

24) Basic word/s: BSc, LLB
Qualifying word/s: none
Level/s: B

3500 BSc
3471 LLB

Different broad fields, therefore, code to first qualification named

Code assigned = 3500

25) Basic word/s: Stud
Qualifying word/s: Env
Level/s: B

???? Stud: code to Studies
3512 Studies, Environmental/ Bachelor

Sc = *science* and is a vague basic word
Env is a common abbreviation for *environmental*

Code assigned = 3512

26) Basic word/s: Studies, Chemistry
Qualifying word/s: Technology (for *studies*)
Level/s: B

3500 Studies, Technology/ Bachelor
3522 Chemistry/ Bachelor

App Sc = Applied Science and is vague
Fields are nested, therefore, assign the more detailed code

Code assigned = 3522

27) Basic word/s: Decorating
Qualifying word/s: Patisserie
Level/s: Certificate

7922 Decorating/ cake/ Certificate

Close match *patisserie* with *cake*

Code assigned = 7922

28) Basic word/s: Nursery
Qualifying word/s: Hothouse Plant
Level/s: Dip, Trade Certificate

4821 Nursery/ horticulture/ Diploma
6821 Nursery/ horticulture/ Trade Certificate

Close match *hothouse plant* with *horticulture*
Match both levels and code to highest qualification

Code assigned = 4821

29) Basic word/s: Management
Qualifying word/s: none
Level/s: Assoc Dip

5110 Management/ NAI (about type of management)/ Associate Diploma

Code assigned = 5110

30) Basic word/s: Catering
Qualifying word/s: none
Level/s: Adv Cert, Trade Certificate

No index entry for *advanced certificate*

Query

31) Basic word/s: Nursing
Qualifying word/s: none
Level/s: B

3221 Nursing/ NAI (about type of nursing)/ Bachelor

Health Science is vague

Code assigned = 3221

32) Basic word/s: Accounting, Finance
Qualifying word/s: none
Level/s: Bachelor

3140 Accounting + Finance/ Bachelor

Commerce is vague

Code assigned = 3140

33) Basic word/s: Reserves, Wildlife
Qualifying word/s: Wilderness (for *reserves*)
Level/s: Associate Diploma

5512 Reserves + Wildlife/ Associate Diploma

Applied Science is vague
Wilderness is extraneous

Code assigned = 5512

34) Basic word/s: Statistics, Research
Qualifying word/s: Operations (for *research*)
Level/s: Grad Dip

2532 Statistics/ Graduate Diploma
2531 Research, Operations/ Graduate Diploma

Same broad and narrow field but different detailed fields, therefore, code to narrow field

Code assigned = 2530

35) Basic word/s: Apiculture
Qualifying word/s: none
Level/s: none

No *NAI* or *except above* entry, so use the field of study code '813' and assign a zero '0' for level

Code assigned = 0813
